

NEW RUSHING PLANS SUBMITTED

Tech Courses to Be Examined by Engineer Group

Favorable Report to Mean Recognition by State Registration Boards

Early in March the University is to be visited by a committee of engineers who are to study the curricula, faculty personnel and physical facilities used in instruction of Civil, Electrical and Mechanical Engineering students. The purpose of this study is to obtain information upon which to report to the Engineers' Council for Professional Development as to the preparation of the University to give instruction in these fields.

If the report is favorable and its recommendations accepted by the Council, these departments will be accredited by the Council as giving instruction of such a grade that they may be recognized by State Registration Boards and other organizations who pass upon the qualifications of practicing engineers.

The Engineers' Council for Professional Development is composed of representatives of the six National Engineering Societies, called the Founders' Societies, and the National Council of State Boards of Engineering Examiners. The six engineering societies are the American Society of Civil Engineers, the American Institute of Mining and Metallurgical Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers, the American Society of Chemical Engineers and the Engineers Society for the Promotion of Engineering Education.

The National Council of State Boards of Engineering Examiners is the national body in which members of these Boards hold membership and represent thirty-eight states having registration laws under which engineers are licensed to practice.

If the engineering departments of the College of Technology are approved by this committee and its recommendation is accepted by the Engineering Council, engineering graduates of the University will be permitted to offer as training for engineering, the scholastic work done here in applying to any state for registration. If the report is not favorable and the adverse report of the Committee is accepted by the Council, engineering graduates of a department not approved will be given no credit for training received here in making such application.

The Engineering Council for Professional Development is recognized as the national accrediting agency for engineering schools by all bodies in America at present desiring a meas-

Mask and Dagger In Galsworthy Masterpiece

Do not fail to see this truly great and moving play, presented by a thoroughly trained cast, a cast composed of both old Mask and Dagger players and several newcomers who ably aid them. The play is a master-

Doris Fowler

piece of play construction, is far more serious in tone than Mask and Dagger's recent offerings which have been largely in the field of comedy, and reveals with pathos and power Galsworthy's reaction to the injustices of our modern economic and political systems. It is an extremely difficult play to stage and calls for acting skill of no small degree from all concerned. It is no exaggeration to say that the performance moved with the precision of clock work.

The security and superiority of the wealthy English family, the Barthwick, offered vivid contrast to the poverty-stricken hopeless lives of the Jones. Mr. Marshall played the part of the self-satisfied, publicity fearing liberal John Barthwick, M.P., while Miss Fowler was superb as his polished, easily shocked wife, whose principal interest was her wholly prejudiced love for her wayward son,

smoothly portrayed by Franklin Burnham.

Another brilliant performance was turned in by the popular Marian Rowe who has appeared in several Mask and Dagger plays, and who made her greatest success last evening. In the role of the righteous, fearful, harassed Mrs. Jones, butt of the blows and abuse of a discouraged, broken husband, and sole support of three infant children, Miss Rowe played the part admirably, and her work is well worth seeing. Charles Ross, as the degenerate husband, a victim of circum-

Warren Marshall

stances, suffering with his wife for an early sin, and unable to bear up under the continual suffering, stamps himself as the leading "underclassman actor" of the University. Ross will be enrolled at New Hampshire for another year, and will bear watching.

Warren Marshall, president of Mask and Dagger, turned in his usual even performance, and his scenes with Miss Fowler were highlights of the play.

Cast in minor parts, several newcomers gave indication that they will be capable of carrying on the high standards of Mask and Dagger dramas

when the present crop of veterans, Burnham, Marshall, McIsaac, Hamlin, Miss Rowe and Miss Fowler are graduated. Robert Tilton, Pal O'Neil and Miss Betty Baxter stood out in their minor but effective roles.

"The Silver Box" is well worth seeing. It is Galsworthy's interpretation of Shakespeare's "Plate sin with gold, and the strong lance of justice hurtless breaks; Arm it in rags, a pigmy's straw does pierce it."

The final performance is tonight—Friday.

The cast:
John Barthwick, M. P., Warren Marshall; Mrs. Barthwick, Doris Fowler; Jack Barthwick, Franklin Burnham; Roper, Roland Hamlin; Mrs. Jones, Marian Rowe; Marlow, Robert Tilton; Wheeler, Doris LeClair; Jones, Charles Ross; Mrs. Seddon, Marguerite Crawford; Snow, Austin McCaffrey; A Police Magistrate, Paul O'Neil; An Un-

Marian Rowe

known Lady, Betty Baxter; Two Little Girls, Mary Lou Jordan, Ann Cherry Jordan; Livens, Ernest Watson; A Relieving Officer, Richard Pratt; An Usher, Constantine Mallis; A Police Officer, Floyd Page.

Kappa Sigma Host to Conclave

Initiation, Luncheon and Dance to Feature Program

The local Beta Kappa chapter of the Kappa Sigma fraternity will be host Friday and Saturday to representatives from all the chapters in the New England District, which includes Brown, Dartmouth, Vermont, Maine, Bowdoin, Mass. State, and M.I.T.

Each year the conclave is held at a different house, thus giving the various chapters an opportunity to see

Conclave

PROF. SCUDDER TO SAIL TO ENGLAND

Harold A. Scudder, professor in the English department, and his wife, will sail for England, March 14. Professor Scudder has been granted a six months leave of absence, and intends to take courses during the Spring term at the University of Cambridge.

In June, James Scudder, '38, will join his parents, and the three plan to travel through England, France, Switzerland and other parts of the continent.

NOTICE

The Women Commuters' Association is giving a late vic party in the Commons Trophy room, Friday, February 28.

Dr. Cabot Gives First of Lectures

Harvard Medical Professor Talks on Diseases and Their Prevention

Dr. Richard C. Cabot, emeritus professor of Medicine at Harvard, gave the first in a series of three lectures in the Community Church auditorium last Wednesday evening. The theme of Dr. Cabot's discourse was "The Wisdom of the Body." He divided this talk into four sections, the first section entitled "reserve." Dr. Cabot stated that many of the organs of the body are much larger than is necessary for them to function efficiently. As an example he cited the case of a man who was living a natural and useful life while only possessing half of one lung which, however, served its purpose perfectly well.

Fraternities Discuss System Devised by Faculty Advisors

Working for the adoption of a new rushing system, faculty advisors to the thirteen fraternities on campus devised this week a broad plan which is being discussed by fraternities and which will come before Casque and Casket for consideration at its next meeting.

Advisors, after discussing evils in the present system, planned the new rules on general terms. Tuesday night each faculty advisor appeared before his fraternity and held discussions on the merits of the suggested plan.

A summary of the new system, open to change and suggestion, follows:

The plan to be followed by the Fraternities will arrange to entertain as members, is expected to accomplish several objectives, i.e., to make it possible for the Fraternities to look over prospective members in a leisurely manner, thus allowing them to become well acquainted before pledging, to cause no harmful interference with the individual's scholastic work, to eliminate friction between fraternities and to obtain a fundamentally simple plan with the minimum number of necessary rules. Full cooperation from all the Fraternities will be necessary and expected.

1. The Sunday following Upper-class Registration of the first semester all Fraternities will hold open house from two until six p.m. All freshmen will be eligible to call on any Fraternity with or without invitation. Fraternities will arrange to entertain as they see fit. It is suggested that probably light refreshments will be served.

2. The inviting of prospective pledges to the Fraternity houses, etc., may start on the following Saturday noon after "open house." This entertaining may continue each week thereafter from Saturday noon to Sunday evening at 8 p.m. In the interest of expense and inconvenience, no overnight entertaining will be allowed. (See note below.)

3. No pledge buttons can be put on any Freshman nor pledges reported before the specified date (to be decided). The names of all pledges shall be reported to the Dean of Men immediately after their pledging on cards provided for that purpose.

4. After the date to be decided on (3) pledges can be reported at any time for the rest of the year.

5. The number of men pledged by any Fraternity shall be limited by a quota plan. The quota will be based on the normal house capacity and will include both active members and pledges. The quota to be determined by the Faculty Advisors of all the Fraternities sitting as a committee, after proper investigation and study. The normal house capacity to be determined by the Faculty Advisor in conjunction with the Fraternity.

6. All pledges must join the Fraternity by October 15th of the school year following the one in which they were pledged. If a pledge does not join by this date, his pledge lapses, after which he cannot be repledged

EDITORIAL

We are getting some action on the vital problem of fraternity rushing and pledging rules at last. For the last several years the fraternities have fought on under a system so outmoded, so inefficient, and with such gross evils inherent in it that it is a wonder that fraternities survived at all.

A new plan originating with the faculty advisors of the fraternities is being presented to the fraternities now. If it is found acceptable, it will go before Casque and Casket and from there to the administration. The outline of the plan is good. It is a constructive attempt to better the position of fraternities on the campus, to give the freshmen a better chance to choose his house, and to allow rushing to be carried on without the necessity for fraternities to resort to the tactics generally ascribed to the small tradesman.

Cut-throat competition between fraternities does not react to the betterment of any fraternity in the long run. Their strength lies in having the largest possible number of successful houses on the campus and the elimination of one fraternity only injures and makes weaker those that remain. Cooperation will build up fraternities. Competition such as has been going on here will destroy them. The new plan demands cooperation from all fraternities. It will not work without the hearty support and cooperation of all. The welfare of the fraternity has always been considered of greater importance than that of the prospective pledge. Such an attitude is shortsighted, selfish, and unfair. Bewildered freshmen have been rushed into houses where they do not fit and where they could never adapt themselves. These men only weaken a house and the whole fraternity structure. They are not assets. They are at most mere dead weight.

The new plan provides plenty of chance for the freshman to look over the field and find the place where he belongs. He will choose the house where he is most at home and there he will do himself and the fraternity the most good.

Society has become aware of the fact that dog-eat-dog tactics do not always pay the greatest dividends. "The survival of the fittest" is beginning to lose its force. The fraternities do well to think now of cooperation as the answer to their prayers. For the last few years especially there has been in evidence a trend toward the abolishing of the fraternities. The fraternities have aided the progress of this trend by refusing to face the situation. On this campus, however, it looks as though we are going to get some action.

Fraternities have an important place in college life. They serve, in a way as no other force could, to bring home to the student a realization of his place and obligations in the general social scheme of which everyone is a part.

This new plan, if it is accepted sub-

President Hauck Talks to Phi Kappa Phi

"High ranking students in college are pretty sure to be successful in their work after graduation," said President Arthur A. Hauck of University of Maine at the initiation and dinner of Phi Kappa Phi, honorary scholastic society, Wednesday evening.

President Hauck based this statement on the Gifford report to the American Telephone and Telegraph Company which was made about ten years ago. He said that he was very pleased to be able to tell the members of Phi Kappa Phi that the results of the Gifford report have been substantiated and confirmed by another survey which has recently been completed. He also brought *Who's Who* to bear witness to the success of Phi Kappa Phi members in all fields of work.

President Hauck lamented the fact that there are so few college men in politics. He called attention to world political scenes and the necessity for well trained leaders.

He closed his informal talk with an appeal to the students to interest themselves in politics, social problems and society in general.

POLITICAL SCIENCE CLASSES HEAR TALK

Attorney Conrad Snow spoke to the Political Science classes in Murkland auditorium Friday morning using for a topic "What the Citizen Should Know About the Constitution."

Attorney Snow, one of the foremost lawyers in the state, showed that the power of the Supreme Court, although fully stated in the Constitution, rests on the four great decisions under John Marshall.

The four cases explained were: *Marbury vs Madison*, *Fletcher vs Peck*, *McCulloch vs Maryland*, *Cohens vs Virginia*, and it was these cases that made the Constitution live as the law of the land said Attorney Snow.

There will be another lecture Friday, at 11 o'clock to which the townspeople and student body are invited.

School for Grange Lecturers

A University School for Grange Lecturers will be held in Durham on Thursday and Friday, March 19 and 20. The meeting will be officially opened by President Lewis. There are to be speakers from the College of Liberal Arts as well as from The College of Agriculture. In addition there will be talks by men prominent in the national and local granges. There will be a banquet Thursday night.

stantially as it has been outlined, will change the whole psychology of the fraternities and will place fraternities on this campus at least on the high road toward a new and bigger success.

ABOUT TOWN

With KCN

Since everyone seems to be suffering with "winter term blues," we will endeavor to spread a bit of sunshine. Here goes—and like our friends Bud and KY we apologize for nothing.

We hear that "G-men" Leo Jositas and Jerry Morrison have as their first case trying to find out who KCN is—and for the benefit of other self-appointed sleuths KCN is not a Chem. student. Nice paint job Patsy of the Cafe had the other day—and what a wicked night she picked. Who was the freshman who signed Chris Fernald's name to his own birthday card? What's the story on the junior premed girl who works in the Chem. department? Huddie has sworn off smoking during Lent—bet she doesn't stick to it. We have been requeste to hand the Lambda Chi's a general slam—O.K. now, Stevie? Is Freddie Burns going the rounds at Alpha Chi? Congrats to Ed Crawford, '36, who was married Saturday. Who stole the polar bear? A little Alpha Xi blonde is wondering if mince pie makes the fellows passionate. Freida and Bucky want to thank Bud for his suggestion, and hope that others may benefit from it. The Chi O's want some publicity—here it is. Ranchy's getting to be a big boy now—he smokes cigars and is trying to grow a moustache. Ralph Mitchell is getting quite domestic but he doesn't want it known. What's the great American correspondence that goes on in one of Prof. Babcock's classes? The peroxide bottle has been circulating in Congreve lately. And the girls in Scott have taken to playing Monopoly. What were the five freshman girls doing in Dover the other night? "Hap" Hazzard is making a collection of antiques in rayon. A certain Scott girl is thinking of opening a funeral parlor with the flowers from Phippy of Phi Mu Delta. Why does "Tiny" Ham spend her week-ends in Concord? So "Radio" is "cussedly ripping" these days. Nice skiing party last week-end—it crippled half of Congreve—including Trudy. Who's the only girl on campus who danced with Ken Reeves? Too bad your roommate wouldn't make your bed on inspection day, Ann. We hear that girls are going to wear ribbons in their hair to signify that they want dates. Congratulations, Hazel. We were going to print something about Don Tabb, but he threatened to wring our neck if we did, so we won't see you later if we aren't discovered and killed first. Here's an addition—one of Priz Glazier's students told her that he was available for a conference any evening. We're gone now.

LETTERS, NUMERALS AWARDED BY W.A.A.

At a meeting of the Women's Athletic Association held recently, numerals and letters were awarded. Numerals were: 1936—Dorothy McLaughlin, Elizabeth Corbett, Evelyn Craton; 1937—Dorothy Colman, Barbara Jordan, Marjorie Carlisle, Genella Barton, Olive Roberts, Ruth Prince, Ruth White, Carol Hooper, Veronica Doe; 1938—Hope Tenny, Thelma Martel, Ruth Greenough, Lucille Truc.

N. H.'s were awarded to the following, who have earned 1000 points in W.A.A.: Eleanora Boston, Winifred Carlisle, Evelyn Craton, Gladys Granville, Nan Pearson.

Electrification Institute Here

The New England Rural Electrification Institute will hold a conference in Durham on March 16-18, under the sponsorship of the Agricultural Engineering Department. The electrification of farms and farm electric equipment will be discussed as well as rural telephone service. They are holding a banquet Tuesday, the 16th.

President Hauck of Maine Speaks at Convocation

Reveals Misconceptions of Americans About Canadians

At convocation on Wednesday, President Arthur A. Hauck of the University of Maine addressed the students on the subject of "International Relations." President Hauck spoke especially of our relations with our nearest neighbor, Canada. He said it was surprising to find out how little most Americans knew about Canada. He remarked that probably few, if any, had ever heard of some of our peace negotiations with Canada or knew the name of the premier. In a test of high school seniors, which he sponsored, the answers to some of the questions were quite revealing. It seems that the general conception of Canada includes a pink splotch on the map, a cold and desolate country, and a handful of uneducated, starving people who cannot speak English.

President Hauck went on to say that Canada is very much like the United States. It belongs to England, although it has its own government, and a great part of the population speaks the English language. A great part of Canada has a climate as favorable as that of the northern part of this country, in fact, two thirds of the Canadians live further south than the most northern boundary of the United States.

He also spoke of the trade we carried on with this country. He said that one time we were trading as much with Canada as we were with Central and South America together.

In closing his speech, President Hauck suggested that the only way that we could expect to get along with other countries was to understand and know something about them, and the only way to do this is through education and the schools.

Weekend Weather Forecast

Friday, Feb. 28, 9 A.M.

Following the passage of yesterday's storm, Polar Continental air arrived in Durham early this morning and skies have cleared and pressure is rising rapidly. Similar moderately cold dry air covers the central states and the interior of Canada, but temperatures in the far Canadian northwest are not as low as they were last week, which indicates that the milder weather of the past few days will continue at least during the weekend, if not longer. Between the continental air and warmer Pacific air over the southwest, another storm has appeared, centered over Montana, but this storm had up to yesterday shown little intensity. It will move eastward during the next two days, reaching New England by Sunday, and may be accompanied by rain, or possibly snow. There are no prominent indications, as yet, of any storm developing in Texas or the Gulf states, though the pressure there is a little below normal, and falling.

For Durham and Vicinity: Fair and colder today. Fresh westerly winds.

Saturday: Continued generally fair with shifting winds, followed by some cloudiness before evening. Temperatures near freezing.

Sunday: Cloudy, possibly with light rain or snow. Continued rather mild. Southerly winds.

Temperatures will probably be somewhat above freezing in Durham during the weekend, except at night, while they will probably be below freezing in northern New Hampshire.

EXTRA

Due to the inability of the Inter-scholastic Basketball Tournament Committee to choose the outstanding Class A teams who will compete for the state championship here next week, the committee has tentatively decided to invite six teams to meet here in a preliminary playoff Monday the winners of which will be invited to the tournament.

Five of the six teams who were invited have readily accepted the idea of the committee. They are: Laconia, Lebanon, Keene, Dover, and Nashua High. The sixth team to receive an invitation, Manchester Central, turned down the suggestion yesterday at a meeting of the school athletic council. The committee has not at present decided what will be done concerning this complication, but it is probable that Rochester High will get Central's bid unless the committee decides to let Manchester come anyway.

Alumni Notes

1935—Emile T. Bozek, '35, was married to Miss Mary E. Ellen Flaherty of Nashua, January 4, at Littleton, Mass. They are living at 327 Chestnut street, Manchester.

1911—Tom Brackett, '11, showed recently a picture of an 18-pound fish caught off shore from Brackett's Camps in Greenland, N. H. The Camps feature, besides fishing off Portsmouth and in the bay, other sports including horseshoes, ping pong, miniature shuffleboard, hiking, rowing, and bathing. If you are thinking of deep sea fishing, you can rent a boat from Tom.

1932—Robert Mauricette, '32, is now employed by the Pacific Mills in Dover.

Frosh Track Men Meet with Andover

Freshmen Not Conceded Much Chance Against Andover

The freshman dual meet with Andover will take place this coming Saturday, Feb. 29 at 2:30 p.m.

Although the freshmen runners have shown marked improvement over the course of the season, the chances of winning this meet are extremely slim. Andover has one of their most powerful and well-balanced teams in recent years. New Hampshire's only chance to make a decent showing rests with one or two of the boys to come through in an individual event. Tabb, of course, can always be depended on to give anyone a battle in the 300. And there is always a chance in the 40 yard dash for a boy who gets a good start. Williams and Parker have improved in the 600, but it is unlikely that either one can match an Andover previous performance of 1.18. In the 1000 Bishop and Leavitt, who in practice lately have been providing each other with plenty of competition may show their heels to the 2.35. Bishop did not run at Exeter. With the steady improvement these boys have shown the chances for a New Hampshire victory in this event are not too remote. In the hurdle event we have only one boy left—Pisciewicz—and he might get a second, if he gets a good start. Second in this event would be good enough, because Andover has a boy who has set a new cage record. In the two field events, the 12 pound shot and the running broad jump New Hampshire is hopelessly out-classed. Even if we had some good men in these events we would be severely handicapped because of the lack of practice facilities. The Exeter cage is the nearest spot for practice and under the circumstances it is difficult to send groups over for regular practice.

Entries:

40 yard dash—Tabb, Sattig, Williams, Levin, Price, Thyng, and MacEachern.

40 yard high hurdles—Pisciewicz, 300 yard run—Tabb, Sattig, Levin, 600 yard run—Williams, Parker Pease, Wyner and Tabb.

1000 yard run—Bishop, Leavitt, Jacques, Clark and Mason.

Shot Put—Korab, Glickman.

Broad Jump—Maillard, Parker, Nathanson and Tabb.

Cabot

(continued from page one)

The second section concerned the delicate balance to be found in the human body. He stated that the healthy human body always remains at approximately 98.6 F. regardless of the temperature outside the body. Man has endeavored to emulate this by means of thermostats and other similar devices, but with little success. He showed how the acid-alkaline balance is always kept constant in the body. If we cause an excess of either to enter the body, a like amount of the other is quickly formed to neutralize it.

Dr. Cabot's third division was compensation. He stated that the human body shows almost unbelievable powers in providing for lost organs. He cited cases in which people had been in accidents that necessitated the removal of part of the liver. Within a comparatively short time, the other

By John J. Finn

This is being written in the Boston Arena and the last semi-final boy has just brushed past us sobbing for breath. The finalists for the 112 pound class are worming their way through the crowd toward the empty ring. We've gone through three cigarettes while waiting, and this pencil is wobbling plenty. Here comes Dalton, inter-city and state champ. Vaulting over the ropes, he dances lightly around the ring. He is good and knows it. Here comes Frank. Lord, his face is drawn, pale. He looks small. Too small. Another cigarette. There he's getting in the ring. No grin as in his trial and semi-final bouts. The referee calls them to the center. Frankie's taller, but the arms and chest of his opponent are nerve-racking to look at. They go to their corners. There's the bell! These flyweights dance around like feathers. Frank jabs, jabs. He's coached well. He mustn't slug with this puncher. The bell ends the round. Not so bad. Another cigarette. The bell again. Dalton out fast. He's throwing them. Fast punches. Wageman backs. He isn't jabbing. What's the matter? Dalton's all over him. A ring-wise veteran, he works Wageman into the ropes. God, there's the bell! Another cigarette. The final round. Gloves touch and look at them go! Wageman's forcing! Left jabs shower Dalton. He's going to win by a knockout. We're on top of chair. Everybody is. There's the bell. Walking around smiling at each other, both panting for breath. We think they both welcomed that bell. Decision? Who cares? He didn't get hurt (much).

Last week, we said one might hazard a guess that probably there was a slight possibility perhaps of Wageman coming through. Three bouts in a night was tough. He won his first, knocked out his opponent in the second (a clean K.O. too) and lost a close one in the finals.

Les Baker, former Boston welterweight who fought Jackie Fields for the championship of the world at the Boston Garden, seconded Wageman, and was no small factor in the Blond Blabber's, Drab Bourlier's, I mean Wageman's nifty showing.

Peterborough (didn't they win the Class B championship last year?) defeated Wilton for the championship of the Monadnock Valley, being undefeated this season. Good tournament prospect.

Elliott Belson, New Hampshire athlete, has vowed that he'll get a letter before graduation places him in the ranks of the unemployed. Well, he's tried everything.

Herb "Blowtorch" Merrill disposes of the last hockey game thus: "You see, I just got out of the infirmary and—"

part of the liver had grown to twice its normal size, and did the work as well as before.

His last division was defense. He showed how the white corpuscles of the blood rush to the place where germs have gained an entrance and fight with them. In doing so they are killed in large numbers, but yet they build up a wall that prevents the germs from entering the blood stream. Dr. Cabot stated that the body, if left alone would cure more than 60 percent of the common ailments that we suffer from. This very frequently happens without our knowing it, and he told of one instance where he had discovered in a post-mortem examination of a man killed by an automobile, four fatal diseases.

In conclusion Dr. Cabot said that he hoped his talk would enable the audience to dispel some of their fears of possible ailments when they saw how well equipped the body is to combat these diseases.

In the discussion which followed Dr. Cabot dispelled many of the fallacious opinions which people in general, and in fact quite a few doctors, have formed concerning the ills of the human body.

Dr. Cabot will give the second in his series of three talks next Wednesday night at the same place and time.

Varsity Pucksters Won over Half of Scheduled Games

Records Show that Wildcats Outscored Opponents by 20 Goals

Even without the advantage of having an indoor rink on which to practice when the weather was unsuitable for outside play, the New Hampshire varsity hockey team under Coach Ernest Christensen finished its season with a total of seven wins and six losses, five of which were to teams which had the benefit of an enclosed rink for practice.

A tabulation of the games played this season show that the Wildcat puckmen amassed a total of 58 goals to their opponents' 38. Four of the wins were shut-outs, while one of the opposing sextets were able to hold New Hampshire scoreless.

The records also show that Russ Martin, flashy sophomore forward was high scorer, with 16 goals and 11 assists to his credit, which, according to "Chris" is a high record for one season. Herbie Merrill was second, with 11 goals and 9 assists, and Bobbie Manchester was third in line with 8 goals and 3 assists.

When questioned about the results of the season, Coach Christensen declared, "The team was not as good and not as well balanced as last year's, but the boys played better at times and seemed to show more scoring punch."

"I consider the season's record very good," continued the hockey mentor. "and the team ended with a nice game against Dartmouth, holding the quadrangular leaders to 4 goals, and considering the fact that they had not skated for a week before the Hanover trip." The Indians are the leaders of the Harvard-Yale-Princeton-Dartmouth quadrangular league.

"Captain Fred Schipper has made an excellent leader," Christensen stated. "He didn't score a lot, but he was the best defensive hockey player on the ice, without any question, and he was also the best man on the ice when New Hampshire players were off because of penalties."

Putting himself at a disadvantage Schipper was willing to go back to the second line to bolster it up and give it more punch.

"The team will miss him very much next year," added "Chris."

The game scores for the season follow:

- N. H., 3; Mass. State, 0.
- N. H., 3; Brown, 6.
- N. H., 8; West Point, 4.
- N. H., 2; Boston University, 6.
- N. H., 12; St. Anselm, 0.
- N. H., 4; M. I. T., 1.
- N. H., 3; Northeastern, 4.
- N. H., 4; Bowdoin, 0.
- N. H., 4; Colby, 5.
- N. H., 6; Northeastern, 2.
- N. H., 3; Boston University, 7.
- N. H., 5; Bowdoin, 0.
- N. H., 1; Dartmouth, 4.

NOTICE

The Board of Supervisors will be in session on the following days and hours for the purpose of correcting the List of Legal Voters for the Town of Durham:

- Tuesday, March 3, 7:30-9:00 p.m.
- Saturday, March 7, 2:00-4:00; 7:30-9:00 p.m.
- Monday, March 9, 2:00-4:00; 7:30-9:00 p.m.

Ski Team Elects Chase as Captain

New Captain has Skied only Two Years—Was High Scorer of Season

Jere A. Chase, '36, of Seabrook, was elected captain of the varsity winter sports team Wednesday. He has been the outstanding man on the squad this year, finishing the season by taking three first places in Maine-N. H. dual meet here last Saturday.

His career as a skier has been short, having taken up the sport only last year after skating, which was his major winter sport, was ruled out of competition in I. S. U. championships. He had never had much experience in skiing, but through diligent practice he developed into a brilliant cross-country runner and ski jumper.

Chase is a baseball regular, playing second base, has received numerals and letters in cross-country, and was a member of the varsity football squad this fall. He is a member of Scabbard and Blade, Blue Key, Sphinx, Theta Chi and is treasurer of his class.

This election is the first time in the history of the University that a captain has been chosen after the close of the season.

Basketball Tournament To Be Held Here

Forced by fate of circumstances to take immediate and decisive action or else suffer the wrath of six towns and counties to fall on their heads, Carl Lundholm after a special meeting of the UNH tournament select-committee made feverish negotiations with six New Hampshire Class A basketball teams in an effort to bring them together in a playoff here. The teams were Lebanon, Keene, Dover, Laconia, Central and Nashua.

Owing to the scant margin of choice between the teams mentioned, the select committee was in a quandary as to which to select and called the special meeting as a last resort.

Lundholm suggests that in all fairness to Central and Dover, Portsmouth and Claremont should cancel games with those teams Friday night, since both the latter teams are invited anyway. The competing teams, five in Class A and eight in Class B will be invited Friday.

The selection committee is composed of Carl Lundholm, chairman; Coach W. H. Cowell, O. V. Henderson, E. Y. Blewett, H. C. Swasey.

1936—Marshall P. Wilder, '36, has accepted a position as Insurance Agent with the John W. Coyne General Agency, of Manchester, of the Penn Mutual Life Insurance Company of Philadelphia.

Belson Reports on Date Bureau

Criticizes Lack of Co-Operation on Part of Students

Elliott E. Belson, honorary mayor of Durham, reports that five men on the University of Maine ski team were given dates last Saturday through the date bureau.

Belson feels that strangers appreciate this service more than those on campus, and he blames the girls for this attitude. He says: "The students here at school fail to take advantage of something that has been founded for their own good. The women on this campus take a very indifferent attitude."

The mayor says that the date bureaus on other campuses have been successful, and he thinks that the proper cooperation is necessary to make it a success on this campus. He advises the girls to try and live up to the slogan at a popular girls' college namely, "Poise, Personality and Pep."

Speaking about his work in the bureau, Belson said: "I have tried to create a friendship between the male and female sex on the campus. I would be only too glad to shake the hand of the man or woman who sits down and writes a letter telling what is wrong with the bureau."

Concerning fraternity and sorority men or women, Belson says: "Fraternity men think that by using their fraternity pin, they are the only one eligible for a date on this campus. The question of the pin should not enter into anyone's mind. The students must learn that a pin will not get them a date when they leave college."

Belson criticizes the attitude of the female element of the University during the rallies. He says: "One example of the poor cooperation we have on campus was fully shown in the football rallies. Credit should be given to those who practically begged the students to come out and cheer for their team. The majority attending were men."

Belson asks for volunteer women to act as contacts in the dormitories and sorority houses. He says that the old slogan still stands: "It's never too late for a date."

Mrs. Naomi Ekdahl Is Speaker at Reunion

Mrs. Naomi Ekdahl was guest speaker at the reunion of the 1935 class of the Northern New England School of Religious Education held in Portsmouth on February 22. Her subject was "Whither, Why and How?"

Early Registration Will Be Allowed

College of Liberal Arts Students Can Enroll March 2 to 13

The Registrar's, Dean's, and Business offices will be open from March 2 to 13 for advanced registration of Liberal Arts students for the Spring term.

Students depending on loans may receive their loans. Scholarships for freshmen and other students will be read and the Registrar will be prepared to receive all enrollment cards.

All students who have available the necessary finances for Spring term registration before they leave at the end of this term will not only save themselves the necessity of returning to Durham in time for March 23, but they will also make it easier for their fellow students who find it impossible to register before leaving at the end of the Winter term. If 200 or 400 students have their registration completed, a considerable amount of registration effort can be saved for themselves, other students, and the University staff.

Miss Bowry To Speak At Girls Convention

Miss Beatrice Bowry, clothing specialist and buyer for Filene's store in Boston, will speak to the Association of Women Students on spring fashions Thursday, March 5 at 4:00 o'clock in Murkland auditorium. The convocation is required for freshman, sophomore, and junior girls. Miss Bowry gives fashion talks over station WEEI in Boston every morning at 9 o'clock.

S.A.E.s Wish House Mother Speedy Recovery

The campus joins with Sigma Alpha Epsilon in wishing a speedy recovery for Mrs. Alice Gribbin, popular house mother, whose recent illness has caused a temporary cessation of her duties. The many friends she has made in her seven years on campus will feel her loss keenly, but none so much as "her boys" to whom Mrs. Gribbin is a true S.A.E. house mother.

Conclave

(continued from page one)

what is happening on other campuses, and also to observe how other houses are run.

Friday evening there will be a dance at the local chapter for Kappa Sigmas and their guests. Roy Lovely and his orchestra have been chosen to play for the occasion.

Saturday morning will be taken up with informal meetings followed by a buffet luncheon at which Dean Alexander will be the guest speaker. At the afternoon session, the boys from M.I.T. will put on a model initiation for the benefit of all the Kappa Sigmas present. At this time, Elmer D'Allasandro of New Hampshire will be initiated. Saturday night a formal banquet will be held in the Commons.

Much interest is being shown in the conclave, and it is expected that fifty men will be in attendance at the sessions, including William R. Mattson District Grand Master of New England; Hamilton W. Baker of the Supreme Executive Committee, Alumni advisors of the several chapters; and many old New Hampshire Kappa Sigmas.

FEIKER TO SPEAK TO ENGINEERS MARCH 3

H. M. Feiker of the American Engineering Council, Washington, D.C., is to speak March third in James hall at the monthly joint meeting of the student branches of the National Engineering Societies.

The Executive Secretary of the American Engineering Council, Mr. Feiker is to speak on the topic "Recent Developments in Engineering." He comes here from Washington, where he has had unusual opportunity to take part in plans to speed up work in which engineers were working and was able to guide many who called at the Council's offices looking for work.

Rushing

ure of the thoroughness of the training given in these schools to young men whom they may later be asked to sponsor for professional employment.

Clifford D. Walker '23, and Warren H. Gee '30, recently have made use of the registration by New York State of the Department of Mechanical Engineering in obtaining license to practice engineering in that state.

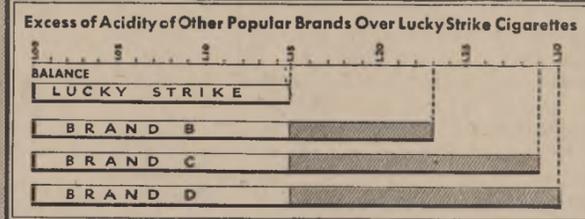

LUCKIES—A LIGHT SMOKE

OF RICH, RIPE-BODIED TOBACCO—"IT'S TOASTED"

Luckies are less acid

Luckies are less acid

Copyright 1936, The American Tobacco Company

Recent chemical tests show* that other popular brands have an excess of acidity over Lucky Strike of from 53% to 100%.

*RESULTS VERIFIED BY INDEPENDENT CHEMICAL LABORATORIES AND RESEARCH GROUPS...

Over a period of years, certain basic advances have been made in the selection and treatment of cigarette tobaccos for Lucky Strike Cigarettes.

They include preliminary analyses of the tobaccos selected; use of center leaves; the higher heat treatment of tobacco ("toasting"); consideration of acid-alkaline balance, with consequent definite improvement in flavor; and controlled uniformity in the finished product.

All these combine to produce a superior cigarette—a modern cigarette, a cigarette made of rich, ripe-bodied tobaccos—A Light Smoke.
