Gama Kunz, Freshman and Varsity Relay, Freshman and Freshman Track.
Paul O'Brien—Arcturians, Sophomore Manager of University Basketball.

Student Union Has New Headquarters

Office and Committee Room Open Every Afternoon

The Student Union has established headquarters in the second two rooms on the left side of the trophy room. These two rooms will be used for office and committee work, and the small windows will serve as book-room. From 3:30 to 5:30 every afternoon, and some time in the evening, both rooms will be open, and a member of the student body will be in the office. The book-case will contain a circulating library made up of books issued by Student Union members and anyone else interested in the movement. Professor Trow has already offered to contribute a number of books.

The office and book-room contain only regulation dormitory desks, but the Student Union Committee of the organization has made plans for some much needed interior decorating to give the room more informal and less institutionalized atmosphere. The committee also hopes to add some more comfortable furniture to the room. It is hoped that definite plans have been made for this addition.

Dr. Slobin Addresses Arcturians' Meeting

At a meeting of the Arcturians held Tuesday evening in the Community Church, 6:30 p.m., the Student Council held a meeting of the group.

Dr. Badley, Ph.D., who has been in residence in Bombay for twelve years, while located in India and its people, but more particularly on the improvement of the social condition of the "untouchables." Dr. Badley spoke very generally on the subject of India and its people, but more particularly on the improvement of the social condition of the "untouchables." Dr. Badley spoke very generally on the subject of India and its people, but more particularly on the improvement of the social condition of the "untouchables." Dr. Badley spoke very generally on the subject of India and its people, but more particularly on the improvement of the social condition of the "untouchables." Dr. Badley spoke very generally on the subject of India and its people, but more particularly on the improvement of the social condition of the "untouchables."

"Believe me"

If you have to shave in bed, or just want to, you can get a quick, clean shave with a Shick Shaver. There's a Shick Shaver for you, too. No LATHER. You cannot cut yourself, for it has NO BLADES. It's smooth, fast, and easy. Now you can have a clean shave where the greater part of the people have not been. Dr. Badley, Ph.D., who has been in residence in Bombay for twelve years, while located in India and its people, but more particularly on the improvement of the social condition of the "untouchables." Nominations for the Class of 1936-37 Council.

Of the seniors, the one with the greatest majority will be president of the 1936-37 Council.
YOUR COUNCIL

Next Friday the annual Student Council elections will be held. This is without doubt the most important election that you will ever vote in. The men who are elected are responsible for the welfare of the whole student body.

The election of the Council gives every man a voice in the government of the university and it is very important that he exercise it. He must choose wisely those who vote wisely and who would be a logical candidate for the office. If he is not satisfied with the results—be quiet—so be it.

The vote next Friday, by showing how he has voted, gives every man a voice, not only in what the administration is doing, but in what he has in self-government, will be the gauge for the future. There is a great deal of activity at the Council and all will measure the consideration which is given to the recommendations and decisions of the Council. By submitting any new project or plan, the Council should be the last place in which the administration should be told that it is impossible, to do the job.

The members were present at the meeting he addressed.

Mr. Gritz's obsession in regard to artificiality could have been prevented; critical myopia impregnated as it is with a smudge of egoism, can numb a person's endurance.

The rest of the speech lapsed into a monologue about the part in the satisfaction of the arts that the students were to have.

With Doc Henson

About Town

I'd rather be a senior.

Another ready answer to the question "If you could only cook anything in the world," would be "an omelet," according to a recent survey in the advertising world. This pleasing, simple dish is one so frequently ordered that its preparation has become something of an art. This omelet is done in a pan, and usually with only two ingredients: eggs and butter. It is said that the secret of a good omelet lies in the art of folding the eggs. The right way to do it is to fold one egg at a time, adding the yolk of each to the whites in the same manner as one would add the batter to the waffle iron. The result is a fluffy, light, airy omelet that is sure to please even the most finicky diner.

Approximately fifteen years of farming experience is required by members of the state-soil-conservation committee for New Hampshire, according to records recently forwarded to the Agricultural Adjustment Administration by Director J. F. Jackson of the New Hampshire Extension Service.

The committee members whose appointments have just been approved by Secretary of Agriculture Henry A. Wallace include L. J. Ralph, South Bound Brook; Paul E. Stassel, Candia; and Alphonse A. St. Germain, and of the University of New Hampshire College of Agriculture in 1931. P. F. Robinson, state county-agent leader, has been named their executive secretary. The three committee members are prominent in New Hampshire agriculture, ranging in age from 58 to 70 years, and are college-trained. As appointees of Secretary Wallace the committee is expected to lay down the general rules of programs to be followed in the state with federal approval.

According to Director J. C. Kendall, the New Hampshire Extension Service's part in the soil-conservation program will be advisory and educational, first in acquainting farmers with observations of federal leaders and the approved practices for New Hampshire and finally in instructing them in farming methods which will enable them to meet successfully the soil-conservation requirements of the program.

Young Farmers Ambitions

In Youth Extension clubs established for rural high schools in New Hampshire, and in favor of farm improvement. Of three hundred and fifty quoter recently by W. H. Hoedt, assistant state club leader in charge of the state Youth club of Extension Service and graduate of this university, seventy-five per cent of this large group approved farm courses, in that they can keep accurate records of their farm business, and sixty-three per cent of these students engaged in more of twelve agricultural reading courses offered by Extension Service.

Nominations

made at the request of Major General J. H. Bogle, and the Master Commandant, who selected the University of New Hampshire as one of a group of colleges and universities well qualified to furnish the high type personnel required to conduct the far-flung and internationally important duties of the Corps. This year's request followed the nomination last year of Ronald B. Wilde, '35, outstanding athletic, scholar, and student leader, who accepted his commission last July and is now on duty as second lieutenant with the Marine detachment at the Portsmouth Naval Prison.

Welch, nominated by both President Lewis and Linslet, Colonel Edward W. Putney, Professor of Military Science and Tactics, as the principal candidate, prepared for college at Keene

Fifty Years Experience in Soil Conservation

In this week's concert sponsored by the Student Forum the symphony to be featured is the second of Sibelius in D Major. In addition will be played "Till Eulenspiegel" by Richard Strauss and "A Capriccio de Piano" by Claude Debussy. Prof. Robert Mantor will supplement the program with comments.

New Books in the Library

PI Lambda Sigma Elects Officers

Jane Linslet, '36, Exeter, was chosen president of chapel chapter of PI Lambda Sigma at a recent election. Gertrude Rayes, '38, Dover, was first vice president; Ruth Robinson, '38, Dover, treasurer; and Mildred A. Blazey, '38, Dunstable, secretary.

PI Lambda Sigma is a national sorority with headquarters in New York City.

Badley

Badley spoke at length upon the fate of the college and the suggested reform programs. He said that the program most likely to suc-ceed was that of adopting a completely new system, jeopardized by the recent disbanding of the state Agricultural Adjustment Administration. The program, however, would be the only one to give the college a chance to stay in existence.

The speaker was introduced by Dean Neman Alexander.

Special Service Field at Smith Park Easter

A special Easter service was held at Smith Park chapel at seven o'clock. Caroline P. Welch conducted the service at which twenty-five were present.

Breakfast was prepared and served by a committee composed of Miss Helen Stobie, Miss Lillian Schenkel and Miss Emily L. Newton.

PI Lambda Sigma Elects Officers

Jane Linslet, '36, Exeter, was chosen president of chapel chapter of PI Lambda Sigma at a recent election. Gertrude Haynes, '38, Dover, was first vice president; Ruth Robinson, '38, Dover, treasurer; and Mildred A. Blazey, '38, Dunstable, secretary. Plaintiff delegates will be Veronica Dos '31, Jane Linslet, '35, and Jacqueline Prichard, '35.

Badley

Badley (continued from page one)

Badley spoke at length upon the fate of the college and the suggested reform programs. He said that the program most likely to suc-ceed was that of adopting a completely new system, in place of that of the Hints. He said that it was the right of all the Indian people to be socially superior, and that they could be achieved only by enlightened leaders for these people.

The speaker was introduced by Dean Neman Alexander.

19—Dr. Clemson W. Richardson writes from India that he has just moved to a new hospital in the Tibetan country. He says he has spent an interesting time there trying to cope with cancer, leprosy, huge ulcers, berias, leprosy, ulcers, tuberculosis, diphtheria, etc.
