Folk Club Offers Gifts to Students

It was recently announced that the Women Student Loan Fund is charged to a gift fund, called the Folk Club Fund for Women Students. The purpose is to make gifts to the women of the demitasse or small gifts individually to needy women students. Those girls who feel guilty in need of small funds to help them over an emergency should apply to Dean Ruth Woodruff.

SEVENTEEN FRESHMEN

Madden and Johnson Head List With Grades Over Ninety

The registrar’s office recently released a list of seventeen freshmen who made the honor roll last semester with an average of 85 or more. Arthur J. Madden, Jr., and Philip C. Johnson were the highest in the list. The list of those who made the honor roll follows: high-average, Arthur J. Madden, Jr., Philip C. Johnson; honor, Thomas P. Kickham, Ruth G. Stimson, George B. Rogers, Phil J. P. Smith, Ralph W. Beyer, Howard C. McClary.

Christian Work, Inc., Holds Interfaith Supper at Ballard

Mr. Irving Hobby Addresses Group on Organists in Germany

Christian Work held its interfaith supper at Ballard hall last Monday evening at six o’clock. Invitations were extended to members of the Catholic church, the Jewish church, the A. Phi Alpha fraternity and Christian Work.

Walter Dooley, the toastmaster, introduced the speaker of the evening, Mr. Irving Hobby of the department of economics, who spoke on his experiences in Germany in the days of the Republic before the National Socialists came into power.

Talk on Germany

Mr. Hobby introduced his talk with illustrations of common stereotypes which twentieth-century people have of the various peoples of Europe. He said that the majority of people tend to think of the Germans as a “savage” hoodlum, stunted with a pint of beer in one hand. They are laughed at in the other. He said that this point of view was entirely false, and in that reality they were an efficient working people whose skill in diplomacy has recovered for them the majority of the privileges taken away by the Versailles Treaty. He went on to describe the numerous accidents which occurred during his first weeks in the new country and the great amount of red tape encountered in getting settled.

Hitler in Topic

The latter part of the speech was a short resume of the occurrences leading up to the taking over of the government by Adolf Hitler, and the plans by which this man took the country away from economic, governmental and economic difficulties. He stated, however, that many of the methods employed by Hitler in gaining his goal were utilized in the game of politics, for in the absence of a more capable man he is doing much for the betterment of the German people.

Following the talk by Mr. Hobby, there were games and informal discussions for the guests and any others who cared to attend.

The purpose of this party was to encourage the meeting of the guests and to discuss topics of interest to all, and to offer the facilities of the Christian Work quarters to all.

PANHELLENIC HOLDS ANNUAL ELECTION OF CLUB OFFICERS

Blue Circle holds annual election of officers

Tyler unanimously chosen president

Outing club much more active on campus

Richard A. Malle; director of Horse Show, Myrtle Congdon; director of wom-en’s activities, Betty MacNamara; director of trips, James Scudder; director of CABs and Trails, John Lovett; director of Fish and Game, Louis Wyzan; director of Membership and interest, Ar-thur Dalton; director of Carnival, John Dungan; director of Publicity, Maurice Pallas; director of Winter Sports, Rob-bert Jones.

Hampshire, F.B.I. Student in "Bird in Hand"

CHORALE PRELUDE, "JESU, JOY OF MAN’S DEEPEST LONGING" (Continued on page 4)
FRESHMAN SWING HELD IN MEN’S GYM

The Informal dance "Froshman Swing", which will be held in the men’s gymnasium early next week, is the result of the efforts of a group of students who have been working on the details for several weeks. The dance will be open to all members of the class of 1938, and will be held in the afternoon and evening of the 14th of March. The music will be provided by the University orchestra, and refreshments will be served. The dance is sponsored by the Class of 1938, and all members of the class are encouraged to attend.

Weather Forecast

Friday, 10 A.M.

Considerably modified Polar Continental air now covers most of the country east of the Rockies, and by tomorrow Will特に手先の気温が下がる. The interior of New England and the eastern states are experiencing a considerable drop in temperature, and a strong northwesterly wind is expected to continue throughout the day. The wind will be strongest in the eastern states, and may reach gale force in some areas. The interior of the state will be cooler, with a high of 35°F.

Winds are northeast at 20 MPH. Visibility is good, and there is a slight chance of scattered snow showers. The chance of precipitation is zero. The snow will be light, and will not accumulate on the ground. The wind will shift to the northwest, and will be strong throughout the day. The high for the day will be 35°F, and the low will be 25°F. Friday night will bring a slight chance of snow, with a low of 20°F.

Saturday night will bring a slight chance of snow, with a low of 20°F.

THE LISTENING POST

by Donald Mendelson

In view of the fact that the United States Government has become increas­ ingly global in its outlook, it is extremely important that everybody have an idea as to what is going on in the world. And in the world, there is no question about the fact that the order of things is already established. But how about the future? The naturally raises the question as to the extent of government interference or control. One has ample proof that this tendency is present in the present government of our country is the Court Reorganization Plan which would give Federal the government the power to ignore ignorance, and as far as it is presently possible to make the Constitution and all and note an example of guaranteed pre­ vidence of democracy.

The United States is in form a political entity, and in the mass of participation in the election of their rulers and legislative bodies. On the other hand however, there has grown up an economic entity, which controls the vast majority of the nation. The present tendency is for the masses, or in particular, has greatly increased, to gain upon the process of capitalization of the plutocracy.

The University is held up in form a political democracy, and as far as it is presently possible to make the Constitution and all and note an example of guaranteed pre­ vidence of democracy.

New Hampshire Flying Club

The coming of spring brings to a special group on campus who are joined by a common interest and one great hobby—time for the approaching fulfillment of one absorbing dream held throughout the winter—the dream of flight. Almost any day now, two or three members of the University of New Hampshire Flying Club will be taking down their newly repaired glider from the storage racks, packing it carefully on to a newly built trailer, and starting on a thirty-five mile jaunt to the Concord airport to perform in practice what they have been following in theory throughout the winter months. Engaging in one of the most creative extra-curricular activities on our campus, 13 members of the Flying Club this winter have rebuilt the 38-foot glider which was crashed up in 1932 and have been working on a trailer project to transport their vehicle to the hills where full advantage can be taken of updraft and landing facilities necessary to the sport.

The club itself, while not new at New Hampshire, has been reorganized during the past year under the direction of several air-minded students, and E. Howard Stolworthy, professor of aeronautics and aerial navigation in the department of engineering, the first organization of its kind on campus. It was founded in 1932 when a group of young men, all interested in aviation and theory of flight, met for informal aeronautical discussions with the explicit purpose of some day owning and flying a soaring ship of their own. The aims became a reality when club members in the spring of 1932 reorganized in the purchase of a new Waco primary glider with a wingspan of 38 feet.

Early explorations in the young men’s world learning the fundamentals of handling their ship were made to Ogunquit, Maine, where the hard-packed sands at low tide made a runway several miles long and nearly ideal air conditions for preliminary training. Trips were made work-ends, with the fliers camping and sleeping as inexpensively as possible.

There will be a Christian Work Freshman Swing—Tomorrow Night

**Sophomore Hop**

“Freshman Swing”—Tomorrow Night

An independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they liked Luckies and how well they suited my idea of a perfect cigarette. That impression still stands. Immyrecurrent of ‘Hamlet’, with its many performances each week and the attendant tax on my throat, I have seen convinced anew that this light smoke is both delightful to my taste and the ‘top’ cigarette for an actor’s throat.”

---

Leslie Howard says Luckies are “tops” with his throat

“Years ago, as an ambitious young actor, I was impressed how well my throat liked Luckies and how well they suited my idea of a perfect cigarette. That impression still stands. Immyrecurrent of ‘Hamlet’, with its many performances each week and the attendant tax on my throat, I have been convinced anew that this light smoke is both delightful to my taste and the ‘top’ cigarette for an actor’s throat.”

[Notice]

There will be a Christian Work Freshman camp reunion at Dean M. Gale Eastman’s camp on Saturday afternoon at 5:00 P.M. In the evening at 8:00 the group will return to Ballard hall where camp pictures will be shown.
DIESEL ENGINES ARE DEMONSTRATED HERE

The latest developments in Diesel engines are being demonstrated at the university. A program is being presented this afternoon and is to be repeated tonight as several thousand students have registered for the operation instruction, 14 sound moving picture lectures, lectures, and exhibitions.

A truck equipped with sound pictures and audio-visual equipment will arrive in Durham this day. The demonstrations will be continued by the same teachers in the coming semester this year. Students and public are invited to attend either of these programs.

Diesel engines have already flown aircraft, are used in automobiles, trucks and tractors, and also many shipping companies have equipped their ships with Diesel engines. Assistant Professor Walter T. Ackerman of the engineering department states: "The probabilities are that Diesel engines will be used in agricultural and industrial fields in the near future."

FLYING CLUB

(Continued from page 3)

The glider was accepted by the University as a gift of the first Glider Club in the Middle West. The University has the Concord Airport to be a better gliding field than any other in the state, and the initial flights indicate that a fine field of the first class in the region. The ship is a 1½-ton machine, instead of the glider club's one-ton machine.

The glider club has the following officers: president, chairman, chief engineer, and vice-president. The glider wings were inspected and passed by the New Hampshire Public Service Commission.

Vacation interrupted glider activities for the summer, but with the reopening of college last fall, several trips to the Concord Airport were made in the performance of various flights. Miss Ruth and Mrs. Rollo, a student desiring to fly in the glider, had some instruction from the glider pilot in flying techniques.

The article stated that New Hampshire is outstanding for the ingenuity of its glider pilots. A review of recent events bears out the assertion. Two gliders, "Seacloud" and "Carnival" from Hampton, causing a fire when the boat started to fly. One student hitched to New Hampshire where he had to copy the inscription on Wachusett's monument in Tantasqua. Sleeping in the hospital for the insane was one of another strange event. Such stunts included sleeping in the state jail and sleeping in a hatchet of cold water.
