DURHAM, N.H. -- The rainstorm that has affected southern and central New Hampshire since Friday continues to break state rainfall records, according to New Hampshire State Climatologist David Brown at the University of New Hampshire.

Towns on the New Hampshire Seacoast have received nearly a foot of rain since May 12, and more than a foot since May 1. Just half way through the month, Manchester already has broke its all-time monthly record of 10.21 inches of rain set in June 1998, and Portsmouth is close to its all-time monthly record of 15.82 inches of rain set in October 1996.

<u>Location</u>	<u>May 12-15, 2006</u>	<u>Old 4-day May Record</u>	<u>All-time 4-day Record</u>
Concord	8.31"	5.68" (May 28-31, 1984)	7.30" (Mar 3-7, 1937)
Durham	10.73"	6.98" (May 15-18, 1916)	9.84" (Oct 19-22, 1996)
Manchester	8.67"	3.93" (May 28-31, 1940)	7.88" (Oct 6-9, 1887)
Nashua	6.81"	5.15" (May 25-28, 1906)	8.26" (Oct 6-8, 1962)
Portsmouth	11.73"	5.57" (May 29-June 1, 1984)*	13.39" (Oct 19-22, 1996)*

\* recorded at Greenland, NH

<u>Location</u>	<u>Rainfall through May 15</u>	<u>Old May Record</u>	<u>All-time Monthly Record</u>
Concord	9.88"	9.52" (1984)	14.57" (October 2005)
Durham	12.19"	12.00" (1954)	13.92" (October 2005)
Manchester	10.75"	9.46" (1984)	10.21" (June 1998)
Nashua	8.50"	9.34" (1954)	14.79" (October 2005)
Portsmouth	15.71"	9.51" (1984)*	15.82" (October 1996)*

\* recorded at Greenland, NH

Brown, an assistant professor of geography at UNH, is recognized as the New Hampshire State Climatologist by the American Association of State Climatologists and the National

Oceanic and Atmospheric Administration. He can be reached at (603) 862-7052 or [david.brown@unh.edu](mailto:david.brown@unh.edu).
