Dr. Lawrence W. Slanetz of the bacteriological department of the University of New Hampshire is director of an important research paper "Prevalence and Classification of Hemolytic Streptococci in Pasteurized Milk," at the annual convention of the Society of Dairy Technology in Washington, D. C., on December 28, 29, and 30.

Dr. Slanetz has spent two years of re- search with some assistance from gradu ate students in the biology department and Mr. Paul McNichol, a well-known milk technologist, who was in charge of the project on the eight types of bacteria considered significant in the industry.

Mr. McNichol said that yachting might in the future become a university sport; but it will be necessary for the student interested in yachting to have a high degree of skill in driving. He said that only the best boats are considered suitable for competition. Mr. McNichol also discussed the important factors in the selection of a boat and how to handle it. He recommended that yachtsmen should be well grounded in such subjects as weather forecasting, navigation, and seamanship.

The campus building projects are progressing rapidly and will be completed in time for the start of the new term. The fire apparatus will then be finished. The fire apparatus will then be finished. The fire apparatus will then be finished.
Poll Results Interpretations

The returns of the balloting on the boycott show no predominating sentiment either for or against any action toward Japanese goods in this country. A few balloting machines have been bought for general distribution. There is no evidence of any distinct trend.

Many came to the polls with very definite ideas. The reason for their vote was clear and strong. In this group were those who feel that the boycott is necessary to give the present government a clear majority. It was a vote for cooperation with the other nations of the world in the struggle for independence of nations. This view also played an important part in the decisions of those who had studied the arguments on both sides of the question. They saw the Mount Washington Hotel and the old New England mill town as symbols of peace and progress, and they voted for the boycott, feeling that this would be the best way to bring about the end of the war.

The defeat of the boycott was also due to the influence of the radio debate. In many communities, the radio debate was used as a means of influencing public opinion. The results of the radio debate were then used to justify the defeat of the boycott.

This result shows that the American public is not ready to support a boycott of Japanese goods, even though it may be necessary to bring about peace and progress in this country.

Train Stop in Durham

With the coming of a cold winter and a consequent increase in use of the railroads to get back to school from Boston, students at the University of New Hampshire are increasingly finding rail travel the best way to travel home again.

The New Hampshire Monthly, a national magazine, published an article on the subject of the radio debate and in which the editor felt that the free press is one of the greatest assets of democracy, and that it is necessary to protect it against any attempts to stifle the expression of opinion. He also concluded that the radio debate was not a success, and that the New Hampshire Monthly should continue to stand for free speech and free thought.

The New Hampshire Monthly is published by the University of New Hampshire and is available for $1.00 a year.

President Roosevelt Greets Student Union Convention

President Roosevelt, through the National Student Union, greeted the 700 delegates of the Student Union Convention at Vassar College, Poughkeepsie, from February 27 to 30. Mr. Roosevelt stated that "the fact that large groups of students, on their own initiative, are choosing education in view of the fact that the institutions of learning are getting results, so long as those results are satisfactory, should not be a reason for curriculum change. Nor shall they be a reason for curriculum change.

The keynote of the convention is the theme of "democracy in education," and a truly democratic program, which calls for a study of democracy in all its aspects, is being carried on at all the colleges and universities.

The program includes, 1. Democropic, progressive schools. 2. Fight for negro rights. 3. Democratic, progressive schools. 4. Student self-government. 5. Social action Committee on Christian Work.

TENNIS NOTICE

There will be a brief but important meeting Monday night, January 17, at 9:30 P.M. at 511 University. All students interested in participating in the tennis team are strongly urged to attend. If you want anything done, you must have a tennis team this year, your cooperation is needed in the matter.

Food choice for many local writers, particularly in the news business, new world's news will not be

President Roosevelt Greets Student Union Convention

To the Editor:

The New Hampshire Monthly appears to have been somewhat diluted in quality. This is due in part to the multiplicity of joyless jobs yet to be filled by the teaching profession. Then too, the teaching profession is not satisfied with its pay. The salary of a professor doesn't complain very much because he is ever paid too much. But I do object, however, to the conclusion that at last our desperate plight has brought the teaching profession to the door of their employers. How can we do our part to get back to school from Boston and Maine service to the community by introducing regular Durham morning as the polar continental air mass to the campus.

I do object, however, to the conclusion that at last our desperate plight has brought the teaching profession to the door of their employers. How can we do our part to get back to school from Boston and Maine service to the community by introducing regular Durham morning as the polar continental air mass to the campus.

Judges, has erected the best snow sculpture to the sorority or dormitory in class A, of the dormitory. Entries of sororities must be constructed by residents of dormitories. Snow sculpture of dormitories.

NEW ENGLAND

V. Prizes: Trophies will be awarded to the sorority or dormitory in class B—All fraternities and men's dormitories. First period, $25; Second period, $18.50; Third period, $45; Fourth period, $27.75; Fifth period, $13.75.

Class A—All sororities and women's dormitories.

Revol. Daily speaks to Newman Club

Last Tuesday night the Newman Club was fortunate enough to have as its speaker, Father Daily of St. Regis parish, parish of Boston. Father Daily proved to be one of the most entertaining and interesting speakers that the Newman Club has had. He chose as his subject, the kinds of books that educated people of today should read. Especially did he emphasize the tremendous power that books have over their readers in regard to their economic, political, and religious beliefs. Father Daily closed several books as examples, and went into great detail to pass his points. He proved to be a very witty speaker, and at no time did the interest of his audience lag.

Wildcat Hoopsters Defeat Middletown

By Buck Bachman

Sorry—our contribution last week was a little late. However, the current season has been quite productive...and that's the way it should be.

The varsity basketball team ventured back into the victory fold for Tuesday night as it saw a winning streak start for a second time. The 50-45 victory put the squad a total of three games behind the leaders of the Grinnell League.

The win assured the fans of the team's success. It showed that the team could be a force to be reckoned with.

Wildcat senior Dick Martin was chosen captain of the squad and he proved his worth in the game. Martin made the winning basket at the end of the game and his presence on the court was felt throughout.

Martin's win was crucial to the team's success as it proved that the team had the ability to come through in tough situations.

The win was a testament to the hard work and dedication of the team. It showed that the team was capable of achieving success and that they were not just a team that could win occasionally, but one that could consistently win.

Martin's leadership was crucial to the team's success. He was a strong leader and a role model for the younger players on the team.

The win was a turning point for the team as it showed that they could turn around a deficit and come back to win.

Martin's leadership was a key factor in the team's success. He was a strong leader and a role model for the younger players on the team, and his leadership was crucial to the team's ability to come back from a deficit and win.

Martin's win was a testament to his hard work and dedication. It showed that he was a true leader and that he was willing to put in the time and effort to lead the team to success.
