DURHAM, N.H. -- The University of New Hampshire's Advising and Career Center, (UACC) is seeking employers to participate in a Feb. 22 career fair for students in engineering, technology and science programs.

This career fair offers employers an opportunity to meet and interview undergraduate and graduate students interested in advancing their careers through post-graduation employment, leadership programs and internships. More than 400 students are expected to attend. Employers have the opportunity to meet with faculty who attend the event to learn more about industry trends and staffing needs.

“UNH students are eager to work for local New England engineering firms, biotechnology companies and research organizations—as full-time employees and summer interns,” says Bethany Cooper, manager of employer relations and recruiting at UACC.

Students attend career seminars sponsored by UACC during the semester to help them develop resumes and interviewing skills.

Employers interested in recruiting UNH students at this fair and future events are invited to contact Cooper at 862-2029 or Bethany.Cooper@unh.edu for more information.
