

Less Searching, More Finding

UNH Library announces new services platform

Wednesday, August 28, 2019

UNH Library has implemented a new services platform to replace the 25-year old library system and homepage search.

What this means for you:

- Access all library holdings, including course reserves, from within one search box.
- Quickly generate citations for articles, books and more.
- Export citations into your preferred citation-management tool, such as Zotero or EndNote.
- Use your UNH ID and password to renew books, view search history and favorites, request materials from other UNH campuses and more.

The library is offering drop-in sessions during the fall semester to orient you and answer questions. To learn more about the new interface, you may contact your subject librarian to schedule an individual appointment or library instruction session or contact the research or circulation desks at any of the UNH Library locations.

The UNH Library will communicate any updates and will solicit feedback through its website. Examples of the change can be found in these similar implementations at <https://library.northeastern.edu/> and <https://www.bu.edu/library/>.

Links to library materials in MyCourses courses may need to be updated. Contact your subject librarian for assistance. Comments or questions may be sent to library.comments@unh.edu.
