BACKGROUND: The goal of the summit is to build a deeper understanding, develop constructive ideas, and identify traditions that promote healthy celebrations. It will bring together teams of students, university administrators, faculty and community members from universities across the United States to discuss such things as the role of campus climate and culture and the enforcement of campus codes and criminal laws. According to UNH President Ann Weaver Hart, "It is the first step in the process of change, which will take a long-term, multifaceted approach led by students and supported by the university and community."
