

UNHCEMS® Upgrade Upcoming

Chemical safety tool will become more user-friendly

Tuesday, September 27, 2016

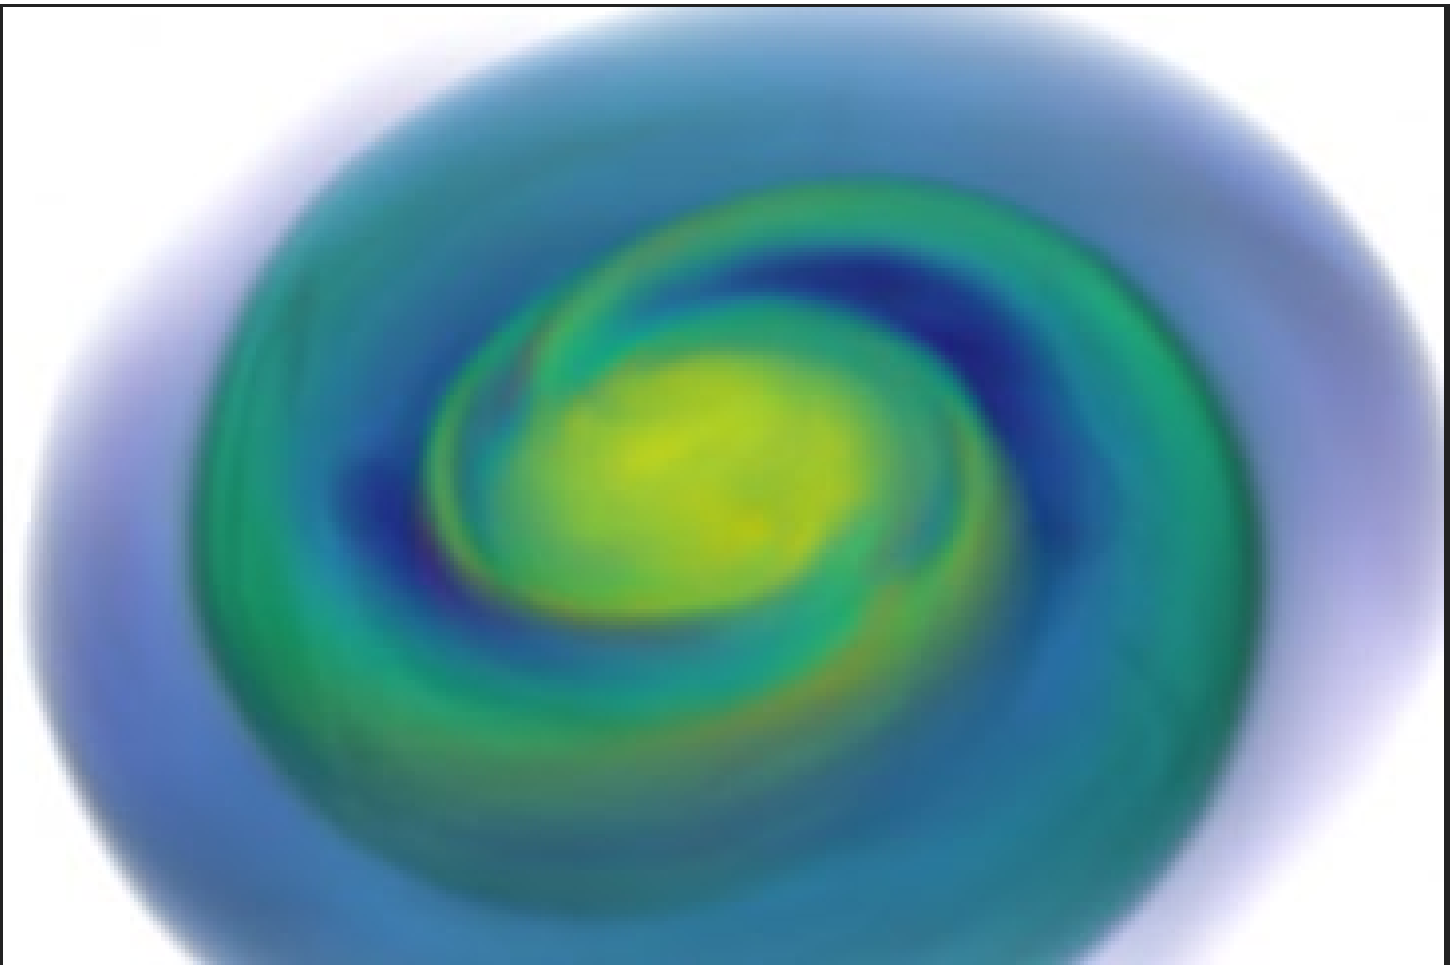

During the second week of October, the Research Computing Center (RCC) will be deploying a major upgrade to [UNHCEMS®](#) (Chemical Environmental Management System), the tool for chemical safety and compliance. Functionality will be much of the same, but the look and feel will change. The user interface for chemical containers will be the most significant change users will notice, but we feel these changes will help to make the user interface more friendly. For information, contact UNHCEMS® administrator, Karrie Myer, at Karrie.Myer@unh.edu.
