

Bye Waste, Hello Warmth

Composting at the UNH Organic Dairy Research Farm

Monday, November 28, 2016

At UNH's [Organic Dairy Research Farm](#), UNH researchers have launched an innovative composting program that provides a high-quality compost product and captures the heat energy for use elsewhere on the farm. It's part of University Professor [John Aber's](#) work looking beyond the cows to see the farm as an agroecosystem. The project is supported by the USDA Program on Sustainable Agriculture Research and Education (SARE) and the [NH Agricultural Experiment Station](#), and the [Joshua Nelson Energy Recovery Compost Facility](#) was funded by an anonymous donor.
