

Faculty Invited to IBM Watson Intro April 6

Sunday, March 26, 2017

UNH has a new educational partnership with IBM Watson Analytics. The partnership will allow all faculty and students to access IBM Watson Analytics for classroom teaching, projects and research. The powerful, cloud-hosted tool will bring the power of Watson to the quantitative and analytic learning you are offering. Watson allows for on-demand data integration, analysis and visualization through an easy-to-understand interface.

The UNH graduate programs in analytics and data science will host IBM for a faculty introduction session on April 6, 2017. Space is limited; [please RSVP to reserve your spot in this training.](#)
