[Daniel Seichepine](#), assistant professor of psychology and neuropsychology with the University of New Hampshire at Manchester, was selected for the 2018 [International Society for CNS Clinical Trials and Methodology \(ISCTM\)](#) New Investigator Award program.

The ISCTM program recognizes promising new investigators across the broad range of methodological, regulatory and

substantive programmatic interests of the society. Seichepine was one of only four applicants selected for the competitive program.

Seichepine is a clinical neuropsychologist with specialization in dementia and sports-related mild traumatic brain injury (i.e. concussion). He has published several peer-reviewed publications on sports-related mild traumatic brain injury, Parkinson's disease, and normal aging. His current research program is examining the long-term effects of repetitive sports-related mild traumatic brain injuries on cognition, mood and behavior.
