UNH Research Finds About One-Third of Medicaid Recipients Affected by Potential Work Requirement

Thursday, July 6, 2017

(HTTPS://WWW.UNH.EDU/UNHTODAY/NEWS/2017/07/06/unh-research-finds-about-one-third-medicaid-recipients-affected-potential-work-requirement)

DURHAM, N.H. – About three in 10 Medicaid recipients could be affected by a potential work requirement, a share that is similar in rural and urban places, according to researchers at the Carsey School of Public Policy at the University of New Hampshire.

Among Medicaid recipients affected, the majority worked at least part of the previous year or were motivated to work but could not find a job. This was slightly higher in rural places than in urban (83.4 vs. 78.7 percent).

As state policymakers consider Medicaid-related work requirements, it is worthwhile to consider the administrative costs of implementing this kind of waiver alongside the benefits of cost savings associated with reducing Medicaid rolls, and the expenses related to increasing the uninsured low income population,” the researchers said. “In both rural and urban places, legislators should consider whether the consequences to families losing health insurance coverage outweigh the relative benefits of enforcing work requirements.”

View the full report here: <https://carsey.unh.edu/publication/3-in-10-medicaid> (<https://carsey.unh.edu/publication/3-in-10-medicaid>). The research was conducted by Andrew Schaefer and Jessica Carson, research scientists in the Vulnerable Families at the Carsey School.

The Carsey School of Public Policy conducts research, leadership development, and engaged scholarship relevant to public policy. They address pressing challenges, striving for innovative, responsive, and equitable solutions at all levels of government and in the for-profit and nonprofit sectors.

The University of New Hampshire is a flagship research university that inspires innovation and transforms lives in our state, nation and world. More than 16,000 students from all 50 states and 71 countries engage with an award-winning faculty in top ranked programs in business, engineering, law, health and human services, liberal arts and the sciences across more than 200 programs of study. UNH’s research portfolio includes partnerships with NASA, NOAA, NSF and NIH, receiving more than \$100 million in competitive external funding every year to further explore and define the frontiers of land, sea and space.
