**Time: 4:00-6:00 pm**

**Location: Demeritt 112**

**Dr. Derek Lynch**

Canada Research Chair in Organic Agriculture

Department of Plant and Animal Sciences

Nova Scotia Agricultural College

Truro, Nova Scotia

Derek Lynch PhD., M.Sc. PAg., is Assistant Professor and Canada Research Chair in Organic Agriculture at the Nova Scotia Agricultural College, in Truro, Nova Scotia. He is a professional agronomist with over 25 years experience in cropping systems and agricultural resource management. Derek's current teaching and research interests include Organic crop production and environmental impact of these systems, nutrient cycling and soil organic matter management in agro-ecosystems, soil microbiology, and productivity of grassland/forage systems. Nationally, Derek has been very involved in the development of the new Canadian standards for organic agriculture. He is also chair of the Canadian Expert Committee on organic agriculture and Eastern Director of the Canadian Society of Agronomy.
