I. INTRODUCTION

A well-known cliché came to life when “[t]he pope’s butler was convicted . . . of stealing the pontiff’s private documents and leaking them to a journalist . . . .” His lawyer’s unsuccessful argument—that taking “only photocopies, not original documents” should not be criminal—prompted this paper.

When tangible property is taken, owners retain nothing. When documents or equivalents are duplicated, however, even if owners retain originals, they suffer loss of control and may lose substantial present and potential advantages, not necessarily economic. Civil redress for such losses has therefore long been available through copyright and trade secret laws. Indeed, it has often been available when injuries occasioned by unauthorized

---

1. “The butler did it” has been called “the biggest cliché in mystery writing” and is “commonly attributed to Mary Roberts Rinehart. Her otherwise forgettable 1930 novel . . . in which the butler actually is the villain.” Why do we think the butler did it?, THE GUARDIAN, http://www.guardian.co.uk/books/booksblog/2010/dec/09/why-we-think-the-butler-did-it (last visited Dec. 9, 2012).

3. Id.
reproduction seem unrelated to goals traditionally advanced by either body of law. Thus, the way information is expressed may be protected by copyright and, until published, if it otherwise qualifies, information as such may also enjoy trade secret protection.

When civil remedies are inadequate to deter theft and vindicate interests of owners and the public, civil remedies can be augmented with criminal penalties. Differences between tangibles and intangibles, however, are often seen to warrant different prosecutorial requirements and penalties.

The second part of this paper explains how federal courts, recognizing those differences, have come to find the National Stolen Property Act (“NSPA”) inapplicable to theft of at least some intangibles. Ones addressed there fall within the scope of the Federal Copyright Act (“FCA”) and the Economic Espionage Act of 1996 (“EEA”).

State copyright jurisdiction is mostly preempted, so the third part of the paper focuses on state trade secret laws. It begins by noting that sources of civil trade secret law are nearly uniform whereas criminal law varies in important respects. Three noteworthy opinions then illustrate diverse state approaches. In one, the highest court in Massachusetts refuses to subject intangible property theft to provisions designed for tangible property. In a second, an intermediate Florida appellate court endorses penalties for theft of both intangibles and tangibles where the overwhelming bulk of value resided in the former and the latter was subject to penalties three times larger. In the third opinion, the New Hampshire Supreme Court affirms conviction for theft of intangibles in circumstances very much akin to those of concern to the Vatican tribunal in that only copies were stolen.

The paper concludes, first, by echoing a suggestion that lack of uniformity in state law justifies federal penalties and expanded jurisdiction. It also advocates more uniformity and better articulation of the subject matter

5. Compare 17 U.S.C. § 102(a) (West 2012) with 17 U.S.C. § 102(b) (West 2012). Only until information is published, is trade secret protection available for subject matter within the § 102(b) exclusion. Thus, in U.S. v. Aleynikov (Aleynikov III), 676 F.3d 71, 73 (2d Cir. 2012), as discussed below, computer code that was protected by copyright also qualified for trade secret protection.

contemplated by the term “intangibles” in, for example, the Model Penal Code.\(^\text{15}\) Finally, the paper argues that even when tangibles such as media are taken, courts should, for example, not base their value on the value of its intangible contents.

## II. Federal Law

### A. Copyrights

The FCA contains a key provision, unfortunately buried deeply:

> On and after January 1, 1978, all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright as specified by section 106 in works of authorship that are fixed in a tangible medium of expression and come within the subject matter of copyright as specified by sections 102 and 103, whether created before or after that date and whether published or unpublished, are governed exclusively by this title. Thereafter, no person is entitled to any such right or equivalent right in any such work under the common law or statutes of any State.\(^\text{16}\)

Thus, except for works not yet fixed,\(^\text{17}\) federal jurisdiction, both civil and criminal, is exclusive.

The Supreme Court, in Dowling, recounts the history of the latter through 1985.\(^\text{18}\) There, defendant had been convicted of selling unauthorized recordings of music that, itself, was covered by copyright.\(^\text{19}\) Yet “Congress did not extend federal copyright protection to sound recordings until the Sound Recording Act of 1971, and then only to sound recordings fixed after February 15, 1972. Therefore, most of the sound recordings involved in this case, as opposed to the musical compositions performed, are apparently not protected by copyright.”\(^\text{20}\)

After being convicted under the FCA,\(^\text{21}\) the NSPA,\(^\text{22}\) and the mail fraud

\(^{20}\) Id. at 211 n.4 (citations omitted).

“Dowling appealed from all the convictions save those for copyright infringement, and the United States Court of Appeals for the Ninth Circuit affirmed in all respects.”24 The Court, however, considers only the NSPA25 “to resolve an apparent conflict among the Circuits concerning the application of the statute to interstate shipments of bootleg and pirated sound recordings”26 where the stolen property consisted of copyright only.27

_Dowling_ begins by observing that copyrights are not ordinary chattels: “The infringer invades a statutorily defined province . . . . But he does not assume physical control over the copyright; nor does he wholly deprive its owner of its use.”28 Turning to the NSPA itself, the Court concludes, following careful analysis of little interest here, that liability based on its language and origins is inappropriate.29

The Court then states:

> The history of copyright infringement provisions affords additional reason to hesitate . . . . Not only has Congress chiefly relied on an array of civil remedies to provide copyright holders protection against infringement, but in exercising its power to render criminal certain forms of copyright infringement, it has acted with exceeding caution.30

Indeed, because the unauthorized sale of recordings in question occurred in 1979, the FCA did not cover them as such.31

After exploring that history at length, it notes:

> The broad consequences of the Government’s theory . . . provide a final and dispositive factor against reading [the NSPA] in the manner suggested. For example, in _Harper & Row, Publishers, Inc. v. Nation Enterprises_, 471 U.S. 539 (1985), this Court very recently held that The Nation, a weekly magazine of political commentary, had infringed former President Ford’s copyright in the unpublished manuscript of his memoirs by verbatim excerpting of some 300 words from the
work. . . . [W]e would pause, in the absence of any explicit indication of congressional intention, to bring such conduct within the purview of a criminal statute making available serious penalties for the interstate transportation of goods “stolen, converted or taken by fraud.”

Moreover, as Dowling finds, “the field of copyright does not cabin the Government’s theory, which would as easily encompass the law of patents and other forms of intellectual property. . . . Thus . . . its view of the statute would readily permit its application to interstate shipments of patent-infringing goods.” In the same vein, it mentions trademarks.

Until 1999, the FCA penalized only infringement “for purposes of commercial advantage or private financial gain.” With generic liability off the table, it became clear ten years later that even the most egregious private malefactors were immune from prosecution absent personal gain. Thus, the portion of the statute most relevant here was amended to read:

(1) In general.— Any person who willfully infringes a copyright shall be punished as provided under section 2319 of title 18, if the infringement was committed—
(A) for purposes of commercial advantage or private financial gain;
(B) by the reproduction or distribution, including by electronic means, during any 180-day period, of 1 or more copies or phonorecords of 1 or more copyrighted works, which have a total retail value of more than $1,000[.]

It might seem a stretch to apply copyright law to documents such as the papal papers, ones not intended for public exposure, much less reproduction

32. Id. at 226 (quoting the NSPA).
33. Id. at 226–27. No penal statute covers patent infringement; the only penalty applicable to patents is 35 U.S.C. § 292(a), amended by § 16(b) of the Leahy-Smith America Invents Act, Pub. L. No. 112-29, 125 Stat. 284 (2011) (false marking).
36. See Dowling, 473 U.S. at 223.
and sale, but religious organizations have, indeed, obtained relief in similar circumstances.\textsuperscript{39} Although copies neither intended for sale, nor sold, have no “retail” value in the hands of owners, the value to transferees would be expected to satisfy the requirement.

B. Trade Secrets

Although federal law provides no civil cause of action for trade secret misappropriation, prosecutors may seek penalties under the EEA.\textsuperscript{40} Unless theft serves foreign interests,\textsuperscript{41} however, stolen secrets must be “related to or included in a product that is produced for or placed in interstate or foreign commerce.”\textsuperscript{42} That would cover most trade secret theft, but a recent case involving a former employee of Goldman Sachs & Company (“Goldman”) illuminates a serious gap.\textsuperscript{43}

After Sergey Aleynikov, a former Goldman employee, was indicted for theft of trade secrets in violation of the EEA, transporting stolen property in violation of NSPA, and unauthorized computer access under the Computer Fraud and Abuse Act,\textsuperscript{44} he moved to dismiss each of these counts.\textsuperscript{45}

Aleynikov prevailed on the third because, although access was abused, the government conceded that it was authorized.\textsuperscript{46} He was subsequently convicted under the NSPA and EEA for theft of proprietary computer source code,\textsuperscript{47} but the Second Circuit reversed both.\textsuperscript{48}

The NSPA conviction was reversed based in part on \textit{U.S. v. Bottone}.,\textsuperscript{49} a Second Circuit opinion that upholds a conviction under the NSPA despite the fact that, as claimed in the Vatican case,\textsuperscript{50} purloined media were copies, not originals.\textsuperscript{51} The force of that part of the case is, however, weakened because

\item \textsuperscript{51} See Bottone, 365 F.3d at 393.
\end{itemize}
the stolen cultures of microorganisms that clearly qualified as goods also moved in commerce, indeed, to Italy.\textsuperscript{52} Although the jury had not been asked to determine whether the cultures as well as the photocopies and the like had met the $5000 statutory threshold,\textsuperscript{53} the court seems to believe that it would have so found if asked. Moreover, it dismisses the significance of the threshold, saying:

“\textquote{The only reason for the $5,000 limitation is to avoid overtaxing the Department of Justice. There is no legitimate interest of (defendants) . . . which the Congress sought to protect by this requirement.}”

We have not the slightest question that the jury would have properly convicted on all counts if only the transportation of cultures had been charged, and the papers had been relied on simply as demonstrating the scope of the criminal enterprise and as enhancing the value of the microorganisms.\textsuperscript{54}

That aside, \textit{Bottone} says, “where no tangible objects were ever taken or transported, a court would be hard pressed to conclude that ‘goods’ had been stolen and transported within the meaning of 2314.”\textsuperscript{55}

Because Aleynikov took no media, the court echoes \textit{Bottone} and concludes, “[s]ome tangible property must be taken from the owner for there to be deemed a ‘good’ that is ‘stolen’ for purposes of the NSPA.”\textsuperscript{56} Moreover, that “\textquote{reading of the NSPA is confirmed by the Supreme Court’s opinion in \textit{Dowling}.}”\textsuperscript{57} Applying \textit{Dowling’s} logic, if not its holding,\textsuperscript{58} the Second Circuit therefore joins other Circuits to find theft of trade secrets outside the ambit of the NSPA.\textsuperscript{59}

The EEA conviction was reversed, too, because “Goldman’s [high-frequency trading] system was neither ‘produced for’ nor ‘placed in’ interstate or foreign commerce. Goldman had no intention of selling its HFT system or licensing it to anyone.”\textsuperscript{60}

It is difficult to imagine why Goldman’s computer source code was not

\textsuperscript{52} \textit{See id. at 392.}
\textsuperscript{53} \textit{See id. at 394.}
\textsuperscript{54} \textit{Id.} (quoting U.S. v. Schaffer, 266 F.2d 435, 440 (2d Cir. 1959), \textit{aff’d}, 362 U.S. 511 (1960)).
\textsuperscript{55} U.S. v. Aleynikov (Aleynikov III), 676 F.3d 71, 77 (2d Cir. 2012) (quoting \textit{Bottone}, 365 F.2d at 393).
\textsuperscript{56} \textit{Aleynikov III}, 676 F.3d at 77.
\textsuperscript{57} \textit{Id.}
\textsuperscript{58} \textit{Id.} at 77 n.4.
\textsuperscript{59} \textit{See id. at 77–78} (citing 10th, 7th, and 1st Circuit cases).
\textsuperscript{60} \textit{Id.} at 82 (citing a district court opinion and quoting § 2413).
also covered by copyright. 61 It, therefore, seems remarkable that Aleynikov was not also indicted under FCA § 506(a)(1). 62 Given that the jury found Aleynikov guilty of violating the NSPA and the EEA, 63 it is hard to believe that it would not also have found that Goldman’s code was taken for “private financial gain” as forbidden by § 506(a)(1)(A). If so, conviction would have warranted imprisonment for up to ten years. 64

The problem revealed by Aleynikov has since been addressed “by striking ‘or included in a product that is produced for or placed in’ and inserting ‘a product or service used in or intended for use in’” in § 1832(a) of the EEA. 65 It is remarkable that substituted language does not read, for example, “a product or service used in or intended for a use that affects.” 66 Thus, the amendment seems not to go far enough. 67

In any event, information of the type misappropriated at the Vatican could now be covered by the EEA despite its being unrelated to any product. Nor would the value threshold noted in Bottone present a problem. 68 Possibly for reasons mentioned there, 69 no value threshold appears in the EEA’s definition of trade secret 70 or in sections spelling out forbidden conduct. 71 Such information would nevertheless be difficult to fit within the EEA’s trade secret definition. 72

62. The district court mentions that Aleynikov was “charged in a three count indictment,” but he was tried on only two of the courts. U.S. v. Aleynikov (Aleynikov II), 785 F. Supp. 2d 46, 51 (S.D.N.Y. 2011). The term, “copyright” appears repeatedly in that opinion, but no reference is found to the FCA.
63. Aleynikov III, 676 F.3d at 73.
67. See Peter J. Toren, An Analysis of Economic Espionage Act Prosecutions: What Companies Can Learn From It and What the Government Should Be Doing About It!, 84 PAT. TRADEMARK & COPYRIGHT J. 884 (Bloomberg BNA, Sep. 21, 2012); see also Peter Toren, Criminal Trade Secret, PETERTUREN.COM, http://petertoren.com/criminal-trade-secret/ (last visited Dec. 9, 2012) (“I was involved in the drafting of the EEA as a trial attorney with Computer Crime & Intellectual Property Section of the United States Department of Justice. Further, the legislative history of the EEA cited a law review article of mine that advocated for a federal criminal trade secrets law.”). The article referenced in the quotation is not cited on the web page, but it is Peter J.G. Toren, The Prosecution of Trade Secrets Thefts under Federal Law, 22 PUPP. L. REV. 59, 96–98 (1994), and is discussed in Part III(A) below.
69. See id.
71. See id. § 1831 (prohibited conduct that benefits foreign entities); and see id. § 1832 (prohibited conduct that benefits anyone other than owners).
72. As defined by § 1839(3), the term is limited to “financial, business, scientific, technical, economic or engineering information.” 18 U.S.C. § 1839(3) (West 2012).
III. State Law

A. Generally

State prosecution for copyright infringement is barred because state action to vindicate “legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright” is preempted.73

Aleynikov’s prosecution for theft under the EEA failed in part for lack of a product “produced for or placed in interstate or foreign commerce.”74 Despite that limitation, he could have been prosecuted under the law of several states, and, he is, in fact being prosecuted under New York state law.75

It also warrants mention that preemptive limits on state jurisdiction have extended beyond copyrights since 1964, when a pair of cases suggested that any state’s prohibition of copying unpatented goods would be preempted by federal patent laws.76 Not until the Kewanee decision in 1974 did it become clear that state trade secret jurisdiction is not barred.77 Indeed, as Justice Marshall writes:

Unlike the Court, I do not believe that the possibility that an inventor with a patentable invention will rely on state trade secret law rather than apply for a patent is “remote indeed. . . .” I have no doubt that the existence of trade secret protection provides in some instances a substantial disincentive to entrance into the patent system . . . .

. . . State trade secret laws and the federal patent laws have co-existed for many, many years. During this time, Congress has repeatedly demonstrated its full awareness of the existence of the trade secret system . . . . Indeed, Congress has in a number of instances given explicit federal protection to trade secret information provided to federal

73. 17 U.S.C. § 301(a) (West 2012).
75. See Brian Mahoney, Ex-Goldman Coder Can’t Collect $2.4M in Attys’ Fees Yet, LAW360 (Dec. 18, 2012), http://www.law360.com/articles/402298 (“Aleynikov was arrested again in August and indicted by a New York State grand jury for offenses related to the alleged theft.”).
76. Sears, Roebuck & Co. v. Stiffel Co., 376 U.S. 225, 232–33 (1964); Compco Corp. v. Day-Brite Lighting, Inc., 376 U.S. 234, 238 (1964) (holding that “if the design is not entitled to a design patent or other federal statutory protection, then it can be copied at will”).
Limits nevertheless remain. Perhaps the most significant is Kewanee’s observation that trade secret law “does not offer protection against discovery by fair and honest means, such as by independent invention, accidental disclosure, or by so-called reverse engineering.” Potentially most significant is the suggestion that states could not, should they so desire, penalize someone who accidentally obtained a secret.

In support of a recommendation that appears to have led to creation of the EEA, Peter Toren found that prosecuting trade secret theft to be difficult in thirty states. When he wrote, only eight explicitly forbade it. Perhaps following the Model Penal Code, twelve states explicitly forbade theft of intangible property. Toren, therefore, regarded conviction in the remaining thirty as problematic absent theft of something tangible. Even among states that enable prosecution for trade secret theft, reported opinions are rare. For example, none have been found outside of California, Florida, Utah, and Colorado. Subsequent enactment of the EEA certainly reinforces his view.

---

78. Id. at 493–94 (Marshall, J., concurring). Subsequent enactment of the EEA certainly reinforces his view.
79. Id. at 476.
80. See Toren, supra note 14, at 96–98.
81. Id. at 95 n.257 (providing a list of states). Updating that list has proven difficult. BLOOMBERG LAW, CORPORATE PRACTICE SERIES PORTFOLIO 43-3D: TRADE SECRETS: PROTECTION AND REMEDIES, TRADE SECRETS, WORKSHEET 12 STATE STATUTES IMPOSING CRIMINAL SANCTIONS FOR TRADE SECRET MISAPPROPRIATION, available at http://www.bloomberglaw.com (listing 19 states); MELVIN F. JAGER, 1 TRADE SECRETS LAW § 4:4 n.16 (2012) (listing 24 states). None of those lists, however, contain UTAH CODE ANN. § 76-6-401(1) (2012), which includes, among property interests protected by the Utah Criminal Code, “trade secrets, meaning the whole or any portion of any scientific or technical information, design, process, procedure, formula or invention which the owner thereof intends to be available only to persons selected by him.”
82. Id. at 95 n.251.
83. MODEL PENAL CODE AND COMMENTARIES § 223.0(6) (American Law Institute) (Official Draft and Revised Comments 1980) (“‘property’ means anything of value, including real estate, tangible and intangible personal property . . . .”).
84. Toren, supra note 14, at 95 n.251.
85. Id. at 94–95; see, e.g., Jun Yang, Kyunghee Park, The Curious Case of Samsung’s Missing TVs, BLOOMBERG BUSINESSWEEK (Nov. 29, 2012), available at http://www.bloomberglaw.com/document/ME9QGNJHBS3K (“While it would be difficult to reverse-engineer the fundamentals of OLED technology from the missing televisions, simply understanding how Samsung packed the parts inside the superthin sets would be valuable information for thieves.”)
86. This is also true of state civil cases because the opinions of state trial courts are infrequently reported. See, e.g., David S. Almeling et al., A Statistical Analysis of Trade Secret Litigation in State Courts, 46 GONZ. L. REV. 57, 59 (2011); see also, David S. Almeling et al., A Statistical Analysis of Trade Secret Litigation in Federal Courts, 45 GONZ. L. REV. 291, 292 (2010) (“The theft of trade secrets is also big business, costing companies as much as $300 billion per year.”) This, no doubt, accounts for the exponential growth of trade secret litigation in federal courts. “[T]rade secret cases doubled in the seven years from 1988 to 1995, and doubled again in the nine years from 1995 to 2004. At the projected rate, trade secret cases will double again by 2017.” Id. at 293 (footnotes omitted).
Before theft of “trade secrets” can be penalized, the term must be defined. In the context of private torts, its definition has been relatively uniform since 1939: “A trade secret may consist of any formula, pattern, device or compilation of information which is used in one’s business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it.”

As noted in the Restatement (Third) of Unfair Competition, “Some early cases elevated use by the trade secret owner to independent significance.” Now, however, “Use by the person asserting rights in the information is not a prerequisite to [trade secret] protection.” That view is also reflected in the Uniform Trade Secrets Act (UTSA) and the EEA. Most states have adopted the UTSA, but nothing equivalent exists for state prosecution of theft of intangibles, even when trade secrets are referenced explicitly.

Three opinions are considered below in chronological order. They seem ample to illustrate important problems that would be faced by state courts in dealing with situations similar to those illustrated by Aleynikov, or the Vatican controversy. Moreover, unlike most of the few cases that have been found, the highest courts in the state issued the first and third opinions.

87. A Westlaw query (da(aft 1/1/1982) & “trade secret” & indict! convict! /s criminal, theft, steal, stolen in ALLSTATES database) yielded roughly a dozen relevant opinions among many results. Such a search would not, however, pick up prosecutions for theft of tangibles such as those discussed supra note 84.

88. RESTATEMENT (FIRST) OF TORTS § 757, cmt. b (1939) (emphasis added).

90. Id.

91. UNIFORM TRADE SECRETS ACT § 1(4) (Nat’l Conference on Uniform State Laws) (1985) (protecting information that “derives independent economic value, actual or potential, from not being generally known” (emphasis added)); see also RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 39 (defining a trade secret as “any information that can be used in the operation of a business or other enterprise and that is sufficiently valuable and secret to afford an actual or potential economic advantage over others” (emphasis added)).

92. See 18 U.S.C. § 1839(3)(B) (1996) (protects information that “derives independent economic value, actual or potential, from not being generally known” (emphasis added)). But note that § 1832(a), quoted supra note 41, differs in that respect.

93. See PAUL GOLDSTEIN & R. ANTHONY REESE, SELECTED STATUTES AND INTERNATIONAL AGREEMENTS ON PATENT, COPYRIGHT, TRADEMARK, AND UNFAIR COMPETITION 28–29 (2012) (listing 48 states and other U.S. jurisdictions that have adopted the Act). Delaware is apparently the only state to incorporate by reference the UTSA definition in its criminal code. See DEL. CODE ANN. 11, § 857(9).

95. See Winfield, supra note 2.

96. See supra note 87 and accompanying text.
On facts similar to those in Dowling, Yourawski was prosecuted for larceny where the property in question was a motion picture on media not itself stolen. Refusing to follow pre-Dowling federal opinions where such action was found within the scope of NSPA, the opinion holds:

We do not read the definition of “property” in G.L. c. 266, § 30(2), as reaching the property interest that is alleged to have been stolen in this case. Certainly, the images and sounds captured on the cassette tapes are not within any of the items specified in § 30(2). We have [sic not] treated § 30(2)’s definition of property as all-inclusive, apart from items that were subject to larceny at common law. Commonwealth v. Engleman, supra, 336 Mass. [66] at 69, 142 N.E.2d 406. Thus, we have not read the word “property” in § 30(2) as broadly as the Federal courts have read the words “goods, wares (and) merchandise” in § 2314. For example, United States v. Bottone, [365 F.2d] at 393-394, held an intangible trade secret to be within § 2314, whereas Commonwealth v. Engleman, supra, held that theft of a trade secret was not a violation of our larceny statute.

The court also points out that “the knowing receipt of stolen trade secrets” was added elsewhere in the statute in 1967.

It warrants mention that the court says:

In light of our conclusion that the intellectual property appearing on the cassette tapes is not property within the meaning of the definition appearing in G.L. c. 266, § 30(2), we need not consider the defendants’ further argument that the Commonwealth’s power to regulate conduct of the type alleged in these indictments is preempted . . .

---

100. One was U.S. v. Bottone, 365 F.2d 389 (2d Cir. 1966), discussed above at notes 49–55.
101. Yourawski, 425 N.E.2d at 299. It is clear in context that the third sentence omits a critical “not.” Id; see also U.S. v. Aleynikov (Aleynikov III), 676 F.3d 71, 77 (2d Cir. 2012) (showing that Bottone is read otherwise in Aleynikov III). Moreover, any suggestion that Bottone might have countenanced convictions for record piracy under the NSPA is clearly overruled by Dowling. See Dowling, 473 U.S. at 218–22.
102. Yourawski, 425 N.E.2d at 299.
103. Id. at 300; see also id. n.4 (referencing 17 U.S.C. § 301).
C. Taborsky

Taborsky, approving a revocation of probation, is the last in a series of opinions addressing the same events. Indeed, a related civil case offers useful information about the indictment: “Taborsky [who took] laboratory notebooks containing proprietary and confidential research . . . was charged with . . . one count of second degree grand theft and . . . one count of theft of trade secrets.”

On the trade secret count, he might have served five years; on the grand theft count, he might have served fifteen. In the opinions, no reference is found to anything tangible other than the notebooks, so the second count is apparently based on their being valued between $20,000 and $100,000.

Following repeated refusals to return the notebooks, resulting in repeated revocations of probation, Taborsky was imprisoned. Although he served eighteen months, he might have served fifteen years, triple the penalty for theft of secrets that overwhelming comprised the value of the notebooks. Dowling, for example, seems to stand for the proposition that, when two provisions might apply, the specific should prevail over the general. If the Florida legislature believed that a particular penalty should apply to a given crime, why would it regard a larger penalty as appropriate

107. See Fla. Stat. Ann. § 812.081(3) (“Any person who . . . steals or embezzles an article representing a trade secret . . . is guilty of a felony of the third degree.”); see also Fla. Stat. Ann. § 775.082(d) (felony of the third degree punishable by “by a term of imprisonment not exceeding 5 years”).
108. See Fla. Stat. Ann. § 812.014(2)(b)(1) (stealing property valued between $20,000 and $100,000 is a felony of the second degree); see also Fla. Stat. Ann. § 775.082(c) (felony of the third degree punishable by “by a term of imprisonment not exceeding 15 years”).
109. Taborsky, 648 So.2d at 749–50.
110. Had Taborsky returned the notebooks, it would have made no difference under the Florida trade secret statute. See Fla. Stat. Ann. § 812.081(3) (“In a prosecution for a violation of the provisions of this section, it is no defense that the person so charged returned or intended to return the article so stolen, embezzled, or copied.”).
112. See IP Advocate, Taborsky Case Study: Wastewater Treatment, available at http://www.ipadvocate.org/studies/taborsky/ (last visited Nov. 25, 2012) (“[Taborsky] was behind bars for a year and a half, four months of which were in a maximum security facility and two months of that on a chain gang. After his release in April 1997, [Taborsky] continued to pursue the overturn of his conviction.”). This is only one of many accounts found by searching for “Petr Taborsky.”
113. See supra notes 108–10.
for essentially the same conduct?

D. Nelson

The facts in the final case considered here most resemble those at issue in the Vatican. As the opinion recounts:

In early 2001, the defendant entered his tenants' apartment with their permission to install a ceiling fan. When the couple left, the defendant entered their bedroom and, without permission, took possession of several intimate photographs of the female tenant, which he found on top of a dresser. He brought the pictures to his nearby apartment, scanned them into his computer, and then returned them to their original location. Several months later, the tenants learned of the defendant's actions and reported the matter to the police. The defendant admitted what he had done when the police confronted him.

As also related in the opinion, Nelson, in his appeal following conviction for receiving stolen property, argues that "the computer-scanned photographic images generated from the original photographs are not 'property' within the meaning of the theft chapter." Additionally, "[h]e further contends that the State's evidence, as a matter of law, did not establish either that the images he retained on his computer constituted 'property of another,' or that he had a 'purpose to deprive' the owner of the photographic images."

Rejecting Nelson’s argument that holding the images on his computer did not amount to receipt of stolen property, the court turns to the statutory definition of property underlying such penalties. As stated there, “property” covers “anything of value, including . . . intangible personal property,” as well as services, and trade secrets. The court then concludes on a point highly relevant here:

Integral to ownership . . . is the right to exclude others from possessing, using and enjoying a particular item of property.

120. N.H. REV. STAT. ANN. 637.7(I) (1986).
121. Nelson, 842 A.2d at 84–85.
Thus, the owner of the photographs at issue had the right to select who would have access to view them. Though the defendant returned the original photographs, he kept a computer reproduction of the captured images, without permission, and it is these images he was convicted of unlawfully retaining. Therefore, the evidence was sufficient as a matter of law . . . .

Nelson’s attorney did not argue that theft of such images may only be prosecuted under the FCA. Indeed, had federal prosecution been attempted, the need to demonstrate that the stolen images had a retail value exceeding $1000 could have presented serious difficulty.

In any event, had preemption been argued, that too might have failed. Insofar as information in the photographs was apparently not intended for public viewing, it might as readily fall within the realm of trade secrets as copyrights. If so, state jurisdiction would not be defeated by federal preemption.

IV. SUMMARY AND CONCLUSIONS

Since January 1, 1978, copyright in documents, published or unpublished, is exclusively a matter of federal law. After Dowling, federal prosecutions based on generic penal statutes seem unlikely except for theft of media that happens to contain copyrighted subject matter. Nor, in
the latter instance, would anything seem to bar state prosecution.\textsuperscript{129}

Since 1996, federal prosecution for theft of trade secrets has been possible under the EEA.\textsuperscript{130} As mentioned above, the facts of \textit{Aleynikov}\textsuperscript{131} illustrate how prosecution under that act could easily overlap with prosecution under the FCA.\textsuperscript{132} Why the latter was not pursued is a mystery.\textsuperscript{133} In any event, prosecution under both the NSPA and the EEA failed because no goods were involved.\textsuperscript{134} The latter failure appears to have resulted from an inadvertent legislative gap apt now closed.\textsuperscript{135}

States clearly may prosecute those who steal goods,\textsuperscript{136} but prosecution for theft of intangibles has long been based on an assortment of statutes,\textsuperscript{137} at least one of which is preempted.\textsuperscript{138} Published copyrightable subject matter is beyond the reach of state law, civil or penal, but little other than individual state’s statutory limits\textsuperscript{139} prevents the theft of unpublished information that might qualify as a trade secret.\textsuperscript{140}

Roughly half of the states penalize theft of trade secrets specifically,\textsuperscript{141} but those that do offer definitions may be difficult to reconcile with intangible property such as was stolen in the Vatican case.\textsuperscript{142} With regard to that, one opinion finds, “at least some precedent for granting trade secret status to works that are techniques for improving oneself (though not specifically spiritually). Conversely, there is no authority for excluding religious materials from trade secret protection because of their nature.”\textsuperscript{143} That opinion, however, concerns a civil dispute, giving cause to wonder whether courts would resolve the issue the same way in a criminal case.\textsuperscript{144}

Many states penalize theft of "intangible personal property,"145 but no state definitions of that term have been found.146 What might it cover other than information akin to trade secrets, possibly including non-economic as well as economic interests? Must it be alienable? Does it include domain names that are alienable?147 Does it include trademark-related interests alienable but only when included with the sale of a related business?148 What of rights of publicity?149

In that respect, the facts in Nelson150 press the limits of intangible property interests subject to state penal control. One might wonder how the New Hampshire court might have responded if copyright preemption been called to its attention.151 It seems even more of a stretch than with some religious documents152 to regard the contents of the photographs in issue as "trade secrets."153

Privacy seems to have been the victim’s central interest in Nelson,154 and possibly also in the Vatican case.155 It seems highly inappropriate to regard an invasion of privacy as theft of property.156

Such issues seem ripe for careful legislative attention. Having that in mind, courts should consider such matters as whether a legislature would set, for whatever reason, the penalty for theft of trade secrets at five years, if it intended that the simultaneous theft of otherwise valueless media would warrant a fifteen year sentence.157

145. See supra note 67 and accompanying text.
146. That issue was central, however, in Doe v. Friendfinder Network, Inc., 540 F. Supp. 2d 288 (D.N.H. 2008). Details are of no consequence here, but the court found that "intellectual property" covered a violation of the right of publicity but not an invasion of a right of privacy because the latter is "a personal right, peculiar to the individual . . . which cannot be transferred like other property interests." Id. at 302–03 (citations omitted).
147. See, e.g., § 43(d)(1)(B)(ii)(VI) of the Lanham Act, 15 U.S.C. § 1125(d)(1)(B)(ii)(IV) (making a domain name registrant’s intention to assign rather than use it one of several indicia of bad faith registration, or "cyberpiracy").
149. See Friendfinder, 540 F. Supp. 2d at 288.

155. See Winfield, supra note 2.
156. See supra note 133.
This paper only scratches the surface, but it should support the ultimate conclusion that much remains to be done at the state level if penalties are to be imposed, as well they should be, for crimes involving trade secrets and other intangible property.\textsuperscript{158} If, as this author expects, it would foster better understanding and bring more state resources to bear on increasingly important criminal activity,\textsuperscript{159} something in the nature of a penal UTSA might result in more state prosecutions.\textsuperscript{160}

\textsuperscript{158} See Winfield, supra note 2.

\textsuperscript{159} See Yang, supra note 85 ("[T]he FBI says its pending caseload of espionage cases represents losses to the American economy of more than $13 billion this fiscal year."). It seems likely that many cases are too small to warrant federal attention.
