"Home energy and transportation costs are critical issues in northern New England," said Carsey Institute director Mil Duncan. "Citizens and leaders across the region are wrestling with both how to preserve our quality of life and how to make it possible for low and moderate income families to live in places where energy costs are rising dramatically. The leaders selected as the 2008 Policy Leadership Fellows in this third year of our initiative are making real strides on these tough issues. The Carsey Institute looks forward to working with them and their colleagues over the next year to widen the dialogue and expand our tool box of solutions for both housing equity and conservation."

This work will be led by Andrea Colnes, director of Carsey's Policy Leadership Initiative. The initiative is supported by the Jane's Trust, with additional support for participants from the Maine Community Foundation, The New Hampshire Charitable Foundation, and the Vermont Community Foundation.

The Carsey Institute conducts research and analysis on the challenges facing families and communities in New Hampshire, New England, and the nation. The Carsey Institute sponsors independent, interdisciplinary research that documents trends and conditions affecting families and communities, providing valuable information and analysis to policymakers, practitioners, the media, and the general public. Through this work, the Carsey Institute contributes to public dialogue on policies that encourage social mobility and sustain healthy, equitable communities.

The Carsey Institute was established in May 2002 with a generous gift from UNH alumna and noted television producer Marcy Carsey.
